

Dynaspheres

Dynaspheres are devices made by Dale Pond and his group. They have been built after John Worrell Keely's (1837-1898) Globe Motor with clairvoyant help from Dawn Stranges. Keely's original Globe Motor was a motor with a spinning motion to be used as an energy source. It could only be run by Keely himself. Keely's work was commented to be real for example by Rudolf Steiner (anthroposophical movement) and Helena Blavatsky (theosophical movement). The time was not ready to make the new form of energy available more widely.

Dynaspheres are also alive spiritually. They are here to inspire us to create love and peace. Hopefully in the future Dynaspheres will be run by a force originated in the human being, which is created through the state of selfless love.
