

## 13.18 - Naturally Occuring Reciprocity and Proportionality

13.18 - Naturally Occuring Reciprocity and Proportionality - Celestial/Syntropic/Vibration/Spin decreases velocity and increases power (vibration/rotation) from -00+ to 4++.

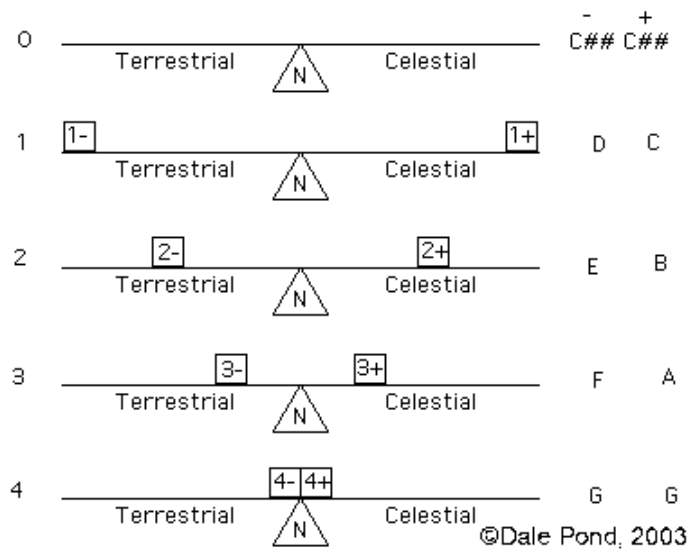

Terrestrial/Entropic/Oscillation/Orbit increases velocity and decreases power (oscillation/revolution) from -00+ to 4++.

The two above actions occur in an inverse relation to each other. One increases the other decreases much as a [seesaw](#) in motion and as the well known [Square Law](#) and its [Inverse Square Law](#).
