

7B.13 - Mind Force in Machinery

"It [the sphere] is now in condition to denote the sympathetic concordance between living physical organisms, or the receptive transmittive concordance necessary to induce rotation." [from 19.02 - Theory of the Induction of Sympathetic Chords to Excite Rotation]; [underline added; this sentence shows the connection to people as we've seen in Atlin, Keely calls **sympathetic concordance** and is "necessary" to induce rotation]

"Keely's researches in this province have shown him that it is neither the electric nor the magnetic flow, but the **etheric**, which sends its current along our nerves; that the electric and magnetic flows bear but an infinitely small **ratio** to the **etheric** flow, both as to **velocity** and **tenuity**; that true coincidents can exist between any mediums, - cartilage to steel, steel to wood, wood to stone, and stone to cartilage; that the same influence, **sympathetic association**, which governs all the solids holds the same control over all liquids, and again from liquid to solid, embracing the three kingdoms, animal, vegetable, and mineral; that the action of **mind over matter** thoroughly substantiates the incontrovertible **laws** of **sympathetic etheric** influence; that the only true medium which exists in nature is the **sympathetic flow** emanating from the normal human **brain**, governing correctly the graduating and setting-up of the true sympathetic vibratory positions in machinery, necessary to commercial success; that these flows come in on the **order** of the fifth and seventh positions of **atomic subdivision**, **compound interetheric sympathy** a resultant of this **subdivision**; that if metallic mediums are brought under the influence of this **sympathetic flow** they become organisms which carry the same influence with them that the human **brain** does over living physical positions, and that the composition of metallic and that of physical organisms are one and the same thing, although the **molecular** arrangement of the physical may be entirely opposite to the metallic on their aggregations; that the harmonious chords induced by sympathetic positive vibration permeate the molecules in each, notwithstanding, and bring about the perfect **equation** of any **differentiation** that may exist - in one the same as in the other - and thus they become one and the same medium for **sympathetic transmission**; that the **etheric**, or will flow, is of a **tenuity** coincident to the condition governing the seventh **subdivision** of **matter**, a condition of subtlety that readily and instantaneously permeates all forms of aggregated **matter**, from air to solid hammered steel, the **velocity** of the permeation being the same with the one as with the other; that the **tenuity** of the **etheric** flow is so infinitely fine that a magnifying glass, the power of which would enlarge the smallest grain of sand to the size of the **sun**, brought to bear upon it would not make its structure **visible** to us; and that, **light** traversing **space** at the speed of two hundred thousand miles per second, a distance requiring **light** a thousand centuries to reach would be transversed by the **etheric** flow in an indefinite fragment of a second." "In addition to the shades mentioned above, there is another that should be mentioned while we are considering the subject. I allude to what might be called the "vitality vibrations," which radiate from the living body, and which are caused by the "[vital force](#)" which permeates the body during life, and makes possible the **running of the physical machinery** some prefer to call it nerve-force. These vibrations show no special [color](#), although when near, or in the body, they manifest a faint reddish tint.

"But when seen away from the body they show a lack of [color](#), like clear water, and resemble the heated air arising from a stove, lamp, or heated ground - that is to say, they look like a colorless, vibrating body of air. The degree and strength of these vibrations depend upon the state of physical health of the person manifesting them." [Chapter XXII - A Glimpse of the Occult World](#)

Rudolf Steiner

"I have told you that in this epoch we have to solve the problem of how the radiations from human states of mind are carried over into machines; of how human beings are to be brought into relation with an environment which must become increasingly mechanised. A week ago I pointed out how superficially this mechanisation is treated in a certain part of the world. I gave you the example of how an American way of thinking tries to extend the realm of the machine over human life itself. [...]

Where this kind of thing goes on, the wish to yoke up human strength with the strength of machines is always involved. It would be quite mistaken merely to oppose these things. They are not going to fade away; they are on the march. The only question is whether in the course of world-history they are going to be brought on to the scene by men who are unselfishly aware of the great aims of earth-evolution and wish to shape these developments for the healing of mankind, or by groups of men who want to use them for their own or the group's selfish ends. That is the issue. The point is not what is going to happen, for it certainly will happen, but how it happens — how these things are handled. The welding together of human beings with machines will be a great and important problem for the rest of the earth-evolution.[...]

Many endeavours will be made to introduce the dead into human existence by artificial means. Along the indirect path through Gemini the dead will be led into human life, with the result that human vibrations will pass over into the mechanism of machines and will continue to vibrate there in a quite definite way. The cosmos will impart motion to the machines by the indirect path I have indicated." [[Rudolf Steiner](#), The Wrong and Right Use of Esoteric Knowledge, Lecture 3, 25 Nov 1917, Dornach, GA 178]
