

Babcock

O. M. BABCOCK, Esq.

Presented a series of lectures on [Keely's discoveries](#) titled [The Doom of Steam](#).

Babcock writes in 1880:- "*This [discoverer](#) has entered a new world, and although an unexplored region of untold wealth lies beyond, he is treading firmly its border, which daily widens as with ever-increasing interest he pursues his explorations. He has passed the dreary realm where scientists are groping. His researches are made in the open field of [elemental force](#), where [gravity](#), [inertia](#), [cohesion](#), [momentum](#), are disturbed in their haunts and diverted to use; where, from [unity of origin](#), emanates infinite energy in diversified forms.*" [[Vibratory Physics - True Science](#), [Keely and Science - Part 1](#) and [Ether the True Protoplasm](#)]
