

Biomagnetism

Schauberger

Biomagnetism is quality. Its adversary is all forms of over-illumination, over-heating or centrifugally engineered increase in pressure. In this case bio-electricity is produced, which, in the form of an atomic force of excess pressure, possesses energies that function electrolytically and over-acidify decompose and kill all forms of life and growth. In the light of this, the deterioration of rivers and lakes becomes quite understandable. Since **biomagnetism** is quality, it follows that there is no constant conservation of energy in the presently accepted sense. There is likewise no equivalence between mass and energy and no insuperable force of gravity within the atmospheric envelope. All there is, is a [rhythmical interplay between bipolar component forces](#), which ultimately inaugurates the final degeneration. In their interactive function as atomic pressural or suctional forces and through the biological vacuum thereby created, they also produce the best and cheapest driving force for machines.

As a result of all this the scales fell from the eyes of an ecclesiastical scholar, when I explained to him that the earthly remains of life (mineral and metallic trace-elements) were essential for the processes of reproduction, regeneration and upward evolution. Whereupon he responded, "My, but what a joke it would be, if we too had got hold of the wrong story! If the true rigmarole of the resurrection can only begin, when all the various cadavers are moved planetarily in the womb of All-Mother Earth, a motion the techno-academic school-aristocrats have now turned inside out and into the opposite, then after we've gone every last remnant of culture must also disappear!"

"Indeed," I responded, "it would also be just as futile to sprinkle a dead body with a bucket of holy water. On the contrary, in a grave that is too warm, where the oxygen is aggressive, everything categorically goes to the Devil, and on Earth, due to the absence of [qualigen](#), everything rots away alive."

Accordingly there are only two possibilities: Either this unfortunate form of mass-motion must be prohibited by law, or this thoroughly ruined and polluted work of creation must be blown sky high with the most efficient atomic bombs as soon as possible. - Amen. [[Schauberger, The Energy Evolution - Harnessing Free Energy from Nature](#), pages 20-21]

The product of this [involuting motion](#), which always [converges](#) to a [point](#) while at the same time [curling](#) in upon itself, is **biomagnetism**. That it is also contingent on the presence of [catalytic influences](#) will not be further discussed here. As such, **biomagnetism** extends itself [longitudinally](#) and [radiates](#) its [surplus energies vertically](#) and, for example, draws the [trout](#) along in its [wake](#). The [trout](#) can so regulate this [upsuctional force](#) with its [gills](#) that even its [motionless stance](#) and equally well-known mastery of [gravity](#) becomes understandable in the light of the above. The [weight](#) of physical [masses](#) only exists in the [atmospheric living space](#). Above this the [force of levitation](#) prevails as [inverted gravitation](#). Consequently, all [pressure-](#) and [heat-intensifying motion](#) must inevitably function all the more irrationally, uneconomically and [development-impedingly](#), the more it is [accelerated](#) and [strengthened](#). To this end raw materials are squandered to such a degree that a growing dearth of them is unavoidable. [[The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines](#)]

An exact [chemical analysis](#) revealed that [over-acidified](#) products of [emulsion](#) are created by present systems of [mass-motion](#). In contrast, a 100% **biomagnetically surcharged concentrate** of [qualigen](#) is produced by [planetary forms of motion](#). When infused into drinking [water](#), it greedily binds excessive [agglomerations](#) of [oxygen](#) and purges the [body](#). [Cancerous tumours](#) and growths become [neutralised](#) in the process and it is therefore the [natural preventive](#) of [cancer](#) and indeed the means of [healing](#) it. [Science](#) was never able to discover these things as all it knew was the opposite form of [mass-motion](#) that has caused all the [havoc](#) in the world. [Growth](#) is none other than **biomagnetism** has been solidified by the [diffuse effects](#) of [light](#) and [heat](#). As a logical consequence, therefore, [over-illuminated](#) and / or [overheated](#) mountain [springwaters](#) must sink and their sources dry up. Biomagnetism is [quality](#). Its [adversary](#) is all forms of [over-illumination](#), [over-heating](#) or [centrifugally](#) engineered increase in [pressure](#). In this case [bio-electricity](#) is produced, which, in the form of an [atomic force](#) of excess [pressure](#), possesses energies that function [electrolytically](#) and [over-acidify](#), [decompose](#) and [kill](#) all forms of [life](#) and [growth](#). In the light of this, the [deterioration](#) of [rivers](#) and [lakes](#) becomes quite understandable. Since **biomagnetism** is [quality](#), it follows that there is no constant [conservation of energy](#) in the presently accepted sense. All there is, is a [rhythmical interplay](#) between [bipolar component forces](#), which ultimately inaugurates the final [degeneration](#). In their [interactive function](#) as [atomic pressural or suctional forces](#) and through the [biological vacuum](#) thereby created, they also produce the best and cheapest [driving force](#) for machines. The final product of this interaction is **biomagnetism**. Excess energy is emitted mainly in a vertical direction. If run through vacuum tubes, they emit blue-green light. On the contrary, other forces demonstrate a dark red, strongly pulsating light effect on the periphery of a vacuum lamp. The first are spiritual (atomic), **biomagnetic** and encouraging ethers, which, on their ascending path, attract and absorb the atmospheric oxygen in its diffuse state. At the same time, a tornado-like, expanding upwards and besieging water ur-cyclone, which attracts the entire mass of the Earth, is working. This force is surrounded by an expanding development of hardeners that prevent Earth from erosion. Consequently, the peoples of ancient cultures who excessively exploited the movement of planets were supposed to inadvertently lead to the collapse of [Atlantis](#).
