[Atomic Dissociation](#)

[Etheric Dissociation](#)

True Personal Story

When, 1995, we were (foolishly) playing around with our [Brown' Gas Generator](#) we filled a five gallon tank with the stuff at 40 psi. It contained a LOT of gas. About six of us were standing around this tank which was connected to hoses and a torch. One guy was melting concrete and we were intently watching when a tremendous sharp BANG took place startling us all. The gas had backfired up the hoses and ignited the tank. We all looked sheepishly at each other knowing we had just escaped certain [death](#). The gas had [imploded](#). If it had exploded all of us and the building would have been destroyed. Later I used that same tank (less pressure) and ran a VW on it around the parking lot. The gas was allowed to be drawn into the carb while mixing with air. [Dale Pond](#)
