

Discordance

noun: a harsh mixture of sounds, [discord](#)

noun: strife resulting from a lack of agreement

Keely

"I find in my researches, as to the [condition](#) of [molecules](#) under [vibration](#), that **discordance** cannot exist in the [molecule](#) proper; and that it is the highest and most perfect structural [condition](#) that exists; providing that all the [progressive orders](#) are the same. **Discordance** in any [mass](#) is the result of [differentiated](#) groups, induced by [antagonistic chords](#), and the flight or [motions](#) of such, when intensified by [sound](#), are very tortuous and [zigzag](#); but when free of this [differentiation](#) are in [straight lines](#). Tortuous lines denote **discord**, or [pain](#); [straight lines](#) denote [harmony](#), or [pleasure](#). Any [differentiated mass](#) can be brought to a [condition](#) of [harmony](#), or [equation](#), by proper media, and an [equated sympathy](#) produced." [Keely and His Discoveries, Chapter VII]

"No such thing as **discord** exists in the [molecule](#). **Discordance** results from [chords](#) producing [differentiation](#) and may be equated by the proper [chord](#) of [harmony](#). Every gaseous [molecule](#) is a [resonator](#) to any and all vibrations, whether [concordant](#) or **discordant**. That which we term **discord** exists in [sound](#) itself, not in [matter](#)." [Snell Manuscript]

All abnormal [discordant aggregations](#) in these resonating [convolutions](#) produce [differentiation to concordant transmission](#); and according as these [differentiations](#) exist in volume, so the transmissions are discordantly transferred, producing [antagonism](#) to pure physical action. Thus, in [motor ataxy](#), a [differentiation](#) of the [minor thirds](#) of the [posterior parietal lobule](#) produces the same condition between the retractors and extensors of the leg and foot, and thus the control of the proper movements is lost through this [differentiation](#). The same truth can be universally applied to any of the [cerebral convolutions](#) that are in a state of [differential harmony](#) to the mass of immediate [cerebral](#) surroundings. Taking the [cerebral](#) condition of the whole mass as one, it is subservient to one general [head centre](#); although as many [neutrals](#) are represented as there are [convolutions](#). The [introductory minors](#) are controlled by the [molecular](#); the next [progressive third](#) by the [atomic](#); and the [high third](#) by the [etheric](#). All these [progressive links](#) have their [positive](#), [negative](#), and [neutral position](#). When we take into consideration the structural condition of the human [brain](#), we ought not to be bewildered by the infinite variety of its [sympathetic impulses](#), inasmuch as it unerringly proves the true philosophy that the [mass-chords](#) of such structures are governed by [vibratory etheric flows](#). There is no structure whatever - animal, vegetable, or mineral - that is not built up from the cosmic [ether](#). Certain [orders](#) of [attractive vibration](#) produce certain [orders](#) of structure; thus the infinite variety of effects; more especially in the [cerebral organs](#). **Discordance** cannot exist in the molecule proper. **Discordance** in any mass is the result of differentiated groups induced by [antagonistic chords](#), and any [differentiated mass](#) can be brought to a condition of [harmony](#) or [equation](#) by proper [chord media](#), and an [equated sympathy](#) produced whether the [mass](#) be metal or [brain](#). [Vibratory Physics - The Connecting Link between Mind and Matter]

"No such thing as **discord** exists in the [molecule](#). **Discordance** results from [chords](#) producing [differentiation](#) and may be equated by the proper [chord of harmony](#). Every gaseous [molecule](#) is a [resonator](#) to any and all vibrations, whether [concordant](#) or **discordant**. That which we term **discord** exists in [sound](#) itself, not in [matter](#)."
