

ENERGY - Snell

(click to enlarge [↗](#))

"**Energy** is a *sympathetic* condition inherent in all forms of aggregated *matter*, *visible* and *invisible*. It is ever present, in its *latent* condition, and is aroused by the *sympathetic disturbers* of its *equilibrium*. By this conservation it becomes transferable. The *sympathetic* correlation of *will force* in the *cerebral convolutionary centres* transfers its *energy* to the physical organism.

"Bring a steel rod in contact with a *magnet* and the **latent energy** in the rod is brought into action without its becoming impregnated by its magnetic *exciter*. **Energy** is an infinite *latent force*. If it did not exist it could not be generated. Consequently, there would be no **energy** to lose nor to conserve. The volume of **latent energy** in the *etheric domain* never increases nor ever grows less. It will remain the same, as yesterday, today, and forever."
