

Ether - Mendeleev

Professor [Mendeleev](#) in his "Principles of Chemistry" gives his reasons for thinking that the [ether](#) is a gas of the [argon](#) group, incapable of combination, with an [atomic weight](#) one-millionth of that of [hydrogen](#) and a velocity of 2,250 kilometers per second. [Eng. ed. 1905, vol ii, p. 526] [Quote from [Le Bon's "The Evolution of Matter"](#) page 89]
