

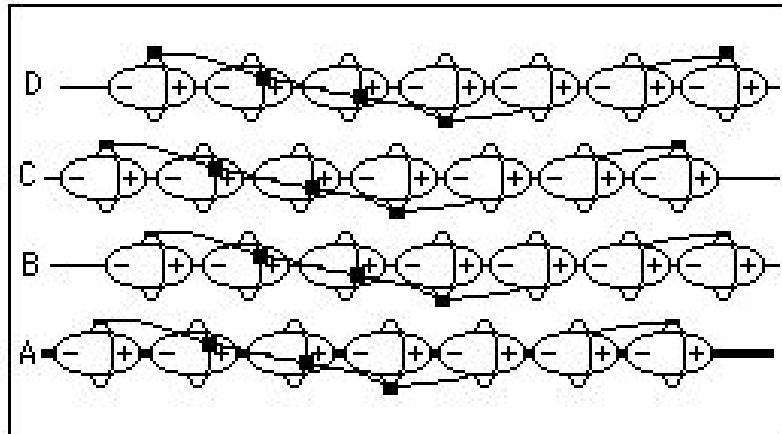

## Figure 7B.19 - Magnetic Lines of Force developed from Induction of Current Flow

**Figure 7B.19 - Magnetic Lines of Force developed from [induction](#) of current flow.**

([click to enlarge](#) ↗)

A = Current carrying wire reaches out to establish [concordance](#) in B, C and D via [sympathetic outreach](#). Which [concordance](#) creates a secondary and tertiary current flow at 90 degrees to the [Outreach](#) through these "lines of force" all via [sympathetic vibration](#).

NOTE: These are not the "lines of force" usually thought of pertaining to [magnetic fields](#).
