

INTERATOMIC BOMBARDMENT

"*Reception* and *dispersion* are kept up in the earth's atmospheric *envelope* by *atomic* and *interatomic* conflict as between the *dominant* and *enharmonic*."

He states he found the *electric stream* to be as free from *percussion* (*bombardment*) as an infant's breath, for "the *three streams* flow together as one in the mildest ways."

Keely

"The *diamagnetic receding movement* in the metal *silver* when brought close to the poles of a *magnet* operated by *alternating current*, is caused by "**interatomic bombardment**" of some 800,000 "*corpuscular percussions*" per second, or, expressed more exactly, by "*intersympathetic vibrations*" (non-operative on *molecular*, *intermolecular* or *atomic sympathy*, but penetrating within these to the *interatom*) or "**interatomic bombardment**". [DIAMAGNETISM - Snell]
