

Keelys orders

order of affinity

"The state or condition of [electricity](#) is wholly [atomic](#) and merely displays the introductory **order of affinity** for terrestrial centers. Because of this [affinity](#) it unites with the magnetic element in the [polar stream](#) by means of [neutral affinity](#). This [neutral affinity](#) keeps the magnetic and electric forces of the earth in stable [equilibrium](#).
[ELECTRICITY - Snell]

order of the atomic vibration

"The electric [current](#) is the first and second **order of the atomic vibration**, a dual force, the flow of which is altogether too tenuous to displace any molecules. The highest conditions associated with [electricity](#) come under the fourth descending **order of sympathetic condensation**, in the atomic [subdivision](#), which is altogether too remote to take any direct part in [etheric](#) disturbances." [Snell Manuscript]

order of etheric vibration

order of liberated ozone

[Keely](#) says "When the ether flows from a tube the negative center represents molecular [subdivision](#) and carries interstitially between the molecules the lowest order of liberated [ozone](#). This is the first order of ozone, wonderfully refreshing and vitalizing to breathe. The second or atomic order ozone, releases a much higher grade of ozone, too pure for [inhalation](#), for it produces insensibility. The third or etheric order of [ozone](#) is used in the carbon register to produce the high vibratory circuit? which breaks up cohesion which I recognize as molecular [magnetism](#)." [TRANSMUTATION BY SYMPATHETIC VIBRATION]

order of light

"Corpuscular activity represents the [outflow](#) of the [ether](#) from the [luminiferous](#) toward [neutral centers](#) of [aggregation](#) revealing the [connecting link](#) between [mind and matter](#). This luminosity has no thermal accompaniment, although, paradoxically, all thermal conditions emanate from [etheric](#) vibration. The [tenuity](#) of the [ether](#) accounts for this. It is only when the streams come in contact with crude [matter](#) that [heat](#) is evolved from its [latent](#) state together with a different **order of light**, from the [luminiferous ether](#), the sun being the intermediate [transmitter](#)." [ETHER - Snell]

order of ozone

[Keely](#) says "When the ether flows from a tube the negative center represents molecular [subdivision](#) and carries interstitially between the molecules the lowest order of liberated [ozone](#). This is the first **order of ozone**, wonderfully refreshing and vitalizing to breathe. The second or atomic order ozone, releases a much higher grade of ozone, too pure for [inhalation](#), for it produces insensibility. The third or etheric **order of ozone** is used in the carbon register to produce the high vibratory circuit? which breaks up cohesion which I recognize as molecular [magnetism](#)." [TRANSMUTATION BY SYMPATHETIC VIBRATION]

His "[carbon register](#)" was a device by means of which he produced a vibratory circuit of sufficient frequency to break up [cohesion molecular magnetism](#) by use of the "etheric **order of ozone**" liberated by [sympathetic vibration](#) of air and water, which it seems he caused to pass into this "[carbon register](#)" and which produced the high frequencies by [chemical affinity](#) or some other form of action on the [carbon](#). [MECHANICAL DEVICES FOR SAFETY]

order of sympathetic condensation

"The electric [current](#) is the first and second order of the atomic vibration, a dual force, the flow of which is altogether too tenuous to displace any molecules. The highest conditions associated with [electricity](#) come under the fourth descending **order of sympathetic condensation**, in the atomic [subdivision](#), which is altogether too remote to take any direct part in [etheric](#) disturbances." [Snell Manuscript]
