"These loops are not like continuous cylinders of *force*, they are divided into *whirling buttons* or discs separated from each other in accordance with the *force* of the *current*." [Polar Interchange - Part III]

Electricity records Mind-thought in rings of light which spin around a Magnetic center of still, invisible light. All motion in all the universe spins around Mind-centers which become shafts as motion extends.

GEOMETRY AND MATHEMATICS OF OCTAVE WAVES

1 The formless zero universe is divided into four pairs of cubes and four pairs of spheres which are concentrically placed within each other. These four pairs of cube-spheres constitute one tonal octave of the universal harp. These tonal octaves are eight in number but appear to be nine for the first half or the ninth octave is the last half of the first. See diagram No.6 below.

THE EIGHT TONES OF AMPLIFIED GRAVITY WHICH ACCUMULATE IN EACH OCTAVE WAVE

3 The explosion of accumulated gravity occurs when the orange-yellow and green-yellow of the color spectrum collide and become "short circuited" by their union with white.

7 Gravity explodes radiatively, at an amplification of 149,398,528.

8 Gravity climbs to 10,476,816.

17 Gravity compression is now 2,088,352.

6 Gravity reaches 285,544.

5 Gravity now equals 33,768.

4 Gravity multiplies to a cube power of 4096.

3rd octave - Gravity = 512.

2nd octave - Gravity power = 64. Wave speed reduces in cube ratio.

1st octave begins here with a gravity power of 8.

"No matter what he does, to upset the **universal balance**, he will find that the **Creator** of **Creation** always **centers** him, and his own unbalanced **orbit** is still on center with his **unbalance**, and is perpetually in a **plane of 90 degrees** from the **shaft** upon which its circlings turn." [Atomic Suicide, page 171]

"It is a commonly known fact by every physicist and laboratory worker that **electricity** runs only in the direction of the turnings in a **solenoid coil**. Every such worker is also perfectly familiar with the effect of **polarization** which evidences its effect at **90 degrees** from the direction - and plane - of the **electric current**. These two seeming directions, and effects, are confusing to him for the idea of **polarization**, as an extension of **stillness**, has not yet entered his thinking." [Atomic Suicide, page 283-284]

Earth, water, air (and light) are organisms, and between them lie the organs of the most diverse nature in a constant state of readiness to act. If we bring these organs together harmoniously; if we place every inner potential opposite its outer harmonic form, then the thing begins to gyrate within and about itself and to evolve, because in rhythmical sequence every impulse is countered by an expulse, through which the harmonic motion gives way to the inflowing and diffusing counter-movement.

The counter-reactive transverse electrical potentials have to be stationed opposite the strongest longitudinal magnetic potentials. Out of this normal state of opposition the harmonic transitional point is created in the golden middle. This golden middle is the **organic angle**. It is the only true pathway upon which there is no upwards, no downwards, no sideways and no inwards, but only a movement in and about itself, which corresponds to the infinite will of God, the unity in the universality.
