

MINERAL DISINTEGRATION

"I have been repeatedly urged to repeat my [disintegrations](#) of [quartz](#) rock, but it has been utterly out of my power to do so. The mechanical device with which I conducted those experiments was destroyed at the time of the [proceedings against me](#). Its [graduation](#) occupied over four years, after which it was operated successfully. It has been originally constructed as an instrument for overcoming [gravity](#), a perfect, [graduated scale](#) of that device was accurately registered, a copy of which I kept, I have since built three successive [disintegrators](#) set up from that scale, but they did not operate. This peculiar feature remained a [paradox](#) to me until I had solved the [conditions](#) governing the [chords of multiple masses](#), when this problem ceased to be [paradoxical](#) in its [character](#). As I have said, there are no two compound aggregated forms of visible [matter](#) that are, or ever can be, so duplicated as to show pure, [sympathetic concordance](#) one to the other. Hence the necessity of my system of [graduation](#), and of a [compound device](#) that will enable anyone to correct the variations that exist in [compound molecular structures](#), or in other words to [graduate](#) such, so as to bring them to a successful operation." [Keely]
