

Negative Principle - Russell

Russell

"The foundation of the physical universe is [motion](#); the ever-changing [motion](#) arising out of pairs of unbalanced conditions which must forever move to seek the balanced [stillness](#) of [unity](#) from which they sprang as multiple [pairs](#) of [units](#).

Unbalanced motion is the **Negative Principle** of instability, multiplicity and separateness which is this physical universe of electric [octave waves](#) of [opposed lights](#).

In the **Negative Principle** there is no [positive](#). It is composed entirely of pairs of [negations](#) which are forever [voiding](#) each other, cancelling each other's [action](#) and [reaction](#), thus negating each other by never allowing either one to exceed its fixed [zero](#) of [universal stillness](#)." [Russell, [The Secret of Light](#), page 17]
