

Neutral Negative Attraction

Keely

"In a *sympathetic negative circuit* this *order of conditions* is *reversed*; for the *power* of **neutral attraction** draws the *molecules* of any *mass*, no matter what the *weight*, toward the *centre of rotation* (instead of toward its *periphery*) according to the *intensity* of the *negative vibration* that is *induced* upon that particular *circle*." [Keely, The Operation of the Vibratory Circuit]
