

Newtonian

Some Newtonian, Mechanical or Classical Forces
([click to enlarge](#))

Classical Physics, **mechanics**. **Force** in **motion** times **mass**. **Vector** mechanics. Same as **Molecular**. The macro or 3D world of **materiality** (3-space), **Maya**, **Materialism**. The **observable** world. **Newtonian** systems are generally considered as **closed systems** which are self-contained and do not readily respond to or allow outside influence such as **scalar forces**. [see **Subdivision**, **Spoon Bending**, **Telekinesis**]

This low **frequency** realm of **matter** and **energy** operates on the basis of **FORCE** in **motion** against **mass**. [See **atheistic materialism**]

Schauberger

Professor **Sauerbruch** was unaware that this **vacuum** comes into being through the **planetary movement** of the **blood**. Had he known, then **medicine** would have taken a completely different course.

I was further able to prove that because contemporary machines operate using [centrifugence](#), [resistances to motion](#) with a [reactive function](#)[12] are

11 Here the German word is 'Qualitatstoff', which literally means 'quality-matter, or substance'. With this Viktor Schauburger intended to describe a higher, 4th or 5th dimensional magnitude of pure quality as a thing in itself and as the driving force in the raising of quality of whatever kind as a 'quality-producer' or 'quality-generating substance' or energy. The English expression term 'qualigen' used here, is a contraction of the two words 'quality' and 'generator'. — Ed.

12 Active and reactive energies, temperatures, etc.: 'Active' essentially relates to the more **physical dimension**, to what is outwardly physical and perceptible, physically palpable, gravitationally affected or oriented, and life-negating, i.e. to energies that tend to curb, limit and brake life, evolution and development. 'Reactive' on the other hand relates to more metaphysical dimensions, to what is inwardly physically intangible, levitationally affected or oriented, and life-affirming, i.e. to energies that tend to foster, re-animate and accelerate life, evolution and higher development. - Ed. [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

Christ Returns - Speaks His Truth

"Science says that life began when in some unexplained way, a correct combination of chemical reactions produced a molecule capable of making copies of itself by triggering further chemical reactions.

Such a description of the enormous and teeming complexity and power of the **LIFE FORCE as being discernible because it is 'capable of replicating itself'**, reveals the basic impoverishment of scientific perception and thought which produced such a theory! Furthermore, the suggestion that such a combination of 'inanimate' chemicals could get together in a specific way - accidentally - to produce such an astounding result of 'self-replication' remains unquestioned scientifically.

This is because the finite human mind, even though scientific, cannot deal with such a strange eventuality of uninitiated 'self-replication'. It is too suggestive of a magical occurrence - of some intervention from an unimaginable source which scientific men dare not contemplate for fear of ridicule.

This sheep-like acquiescence is considered more scientific than producing 'inspired' theories blocked by the **materialistic laws science** has established for itself. This block to future scientific progress will prevent science properly investigating the realm of mind and spirit until some enlightened scientist defies convention and dares to cross the borderline between the 'seen and the 'unseen'.

Prophets of old, if presented with the theory of molecular self-replication would have no difficulty with such a 'magical occurrence' and would say that 'God' made the chemical combinations and imbued them with life. That would not be the right explanation either.

It is this old religious concept of a 'God on High' 'creating from afar' which is blocking the man of science from moving forward to more spiritually aware reflections. Therefore, despite science's seeming emancipation from age-old doctrines, it is still as mentally bound and hindered by fears of ancient shibboleths as in the 19th century. It adopts its ridiculous theories because it has not yet perceived the 'Reality' of **Our Source of Being** behind and with in the living molecule."
