

ROTATION - Snell

"*Rotation* arises from the *harmonic* interaction of the *dominant* and *enharmonic* modes of *vibration*, which are in the ratio of 3:9.

"*Power* of *rotation* comes on the *positive* and power of *negation*, arising when the *receptive* flows become independent of the circular *chord of resonance* (set up mechanically or otherwise) breaks up the rotational power. *Rotation* is caused by the *receptive concussion* of the *positive* and *negative* forces as they come together at the *neutral center* and as each seeks its "coincident" by harmonic waves, flows or streams."

"Every body capable of *rotation* is susceptible to the operation of *force*, which, applied, impels *motion*. *Receptive transmittive concordance* induces *rotation*. This simply means the reception of streams of energy by the *neutral center*, and the transforming of them into radiant outflowing streams of energy causes *rotation* of the *molecule* or *mass*. All the magnets in the world, no matter how differentiated cannot induce *rotation*, but *polar negative attraction* induces *rotation*. The earth's *rotation* is caused and kept in continuance by the action of the *positive* and *negative sympathetic celestial streams*, that is, by the *inflowing celestial* from the sun and the outflowing *radiant celestial* dispersing this same energy to all planetary masses in *space*.

"*Polar* and *depolar differentiation* result in *motion*. The *compound interetheric* or seventh *subdivision* is the *Soul of Matter*, from which all forms of *matter* receive their *introductory impulse*."

"The *neutral center* represents only *focalization* and *distribution* of the streams of energy. It is not associated with *magnetism*. When the radiant elements generated by the focalizing *chord* are submitted to *compound vibration* of their *mass thirds*, those radiant elements become magnetic and *rotation* ceases. (Perhaps the *rotation* is transformed to *polar sector rotation* of these streams). *Rotation* is induced by submitting the *mass* to three different orders of vibration simultaneously, giving the majority to the *harmonic third*.

"When we rotate a *mass* with sufficient rapidity, the particles of that *mass* ultimately overcome *cohesion* by dispersing as fragments at a tangent but should we cause *rotation* of the *ether*, this would produce *condensation*, which is opposite in effect. This *condensation* effect increases with the *velocity* of *rotation* of the *ether*. This is the direct *cause* of formation of molecules as well as planetary masses.

"To control rotational force or produce commercialized energy, we must control through its properties the "*negative attractive*" or "*enharmonic*" current. This will solve the problem up to any limit of power.

At the same time *Keely* was completing his *third system*, he was also completing an experimental sphere in which he intended to test the combination of the *positive* and *negative rotation*. This experiment was at least entirely successful which showed the explanation of *rotation* given above, to be correct. The sphere even rotated with physical vibrations from the *positive* and *negative* interchange of positive and negative waves not streams in this case. He had a desperate struggle in seeking to learn these *laws* of *polarization* and *depolarization*. It was necessary for him to understand these *laws* before he could unfailingly secure *rotation* and control the *reversions* which so often had made wrecks of his machines.
