

Seminal fruit

Schauberger

In order to throw more light on their [origins](#), there are two types of [seeds](#):

1. Those responsible for all physical [forms](#) of [growth](#), which according to their [degree](#) of [maturity](#) fall [down](#) and upon returning into the [earth](#), [germinate](#) and [produce](#) the [increased](#) and [qualitatively ennobled forms](#) of [growth](#). These are the [provenances](#) of [sweet-matter](#) ([carbones](#)), or the
2. **Seminal fruits**, which having fulfilled their [reproductive function](#), become [dormant](#), die off and become the [seminal substances](#), as it were, for the [creation](#) of [quality-matter](#), which after [decomposition](#) are then [transmuted](#) through 'cycloid-space-curve-motion'. [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]

The [trick](#) was then to discover the appropriate [development-facilitating forms](#) in which, through [intensified cycloid motion](#), even the relatively low-quality **seminal-fruits** sucked in by [Repulsines](#) together with their carrier [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]
