

Shungite

A new physical force has been discovered associated with the mineral **shungite**. This mineral produces a measurable [repulsive force](#). This force is not electrical or magnetic or gravitational. So what is it??? (More on this later.)

Fullerenes (c60, for example) are also known by the name "Bucky-balls" after [Buckminster Fuller](#) and his "tensegrity" research, because structurally they resemble some of Fuller's tensegrity domes, and because Fuller actually predicted that there should be carbon molecules which resembled his domes. The formal name for this variety of carbon molecules is "[Buckminsterfullerene](#)".

On 9 October 1996 The Royal Swedish Academy of Sciences decided to award the Nobel Prize in Chemistry to Professor Robert F. Curl, Jr., Professor Sir Harold W. Kroto and Professor Richard E. Smalley for their discovery of fullerenes. **Shungite** (aka: shungit, schungit, shieldite) is the common name for the natural mineral containing fullerenes.

The atomic components of the mineral shungite are:

[Carbon](#) - 20 - 95%,

[Silicon](#) - 5 - 60%,

[Aluminum](#) - up to 4%,

[Iron](#) of-3,5%,

[Magnesium](#) - up to 3,5%,

Kaliy - up to 12%,

[Sulfur](#) - up to 1,2%,

[Calcium](#) up to 0,58%

[Phosphorus](#) - up to 0,34%,

and many other macroelements and microelements as admixtures.

Fullerenes are produced by 2 processes: [Combustion](#) of carbon-bearing fuels, and high [voltage](#), high [current](#) density, electrical discharges through existing carbon deposits, such as coal.

In the Kerelia region of Northwest Russia, very large deposits of a mineral now known as **shungite** (some percentage of fullerenes is found in all **shungite** varieties) were discovered and used for water purification, as far back as Napoleon's time. These unusual mineral deposits came to be known in recent times, as **shungite**.

The deposits in the Karelia region also contain a variety of [carbon](#) known as "carbon glass" or "glassy carbon" or "vitreous carbon". The portions of the Karelia deposits which are in this form are called "**elite shungite**", because this variety of **shungite** is rather rare and has a glassy polish.

Shungite as medicine in the 21st century:

Scientists who have investigated **Shungite** rock have declared unanimously, that it is a miracle mineral! This stone eliminates and absorbs all that imposes a hazard on people, and living beings, but concentrates and restores all that are healthy for a human being. The **Shungite** pyramid is a revolutionary shielding device for protecting the person from harmful electromagnetic radiation from computers, microwave ovens, TV sets, mobile phones and other radio-frequency creations of modern civilization.

The Russian Czar, Peter I, constructed the first well-known Russian **shungite**-based resort named Marsial Waters. The water at the Resort gains curative properties, while passing through thick layers of **Shungite** crust. This **Shungite**-treated water helps with various illnesses: The general condition improves, nervous pressure is removed, and an [inflow of energy](#) is sensed. **Shungite** allows an easier to obtain, steady remission of some chronic diseases of gastrointestinal tract, liver, kidneys, and metabolic processes. With the help of the **Shungite** water skin many diseases are cured much more easily. **Shungite** water sprinkled on the head decreases falling out of the hair. Hair is resilient and healthy looking. **Shungite** water on the face rejuvenates the skin, wrinkles smooth down and skin elasticity restores.

But the most important thing for we the people, living under constant RF stress, strain and unfavorable

ecological conditions are the [regeneration](#) characteristics of **Shungite**, which restore vitality into the human. **Shungite** varieties relieve headaches, backaches, rheumatism, remove neuralgic states, normalize sleep, stabilize blood pressure, clear respiratory tract, and increase activity levels, including the sexual one.

Numerous scientific investigations of the unique properties of **Shungite** allow it to be rightfully named as a Natural Medicine of 21st century.
