

Sympathetic Action

Keely

"The question arises, Why is this condition of the (luminous) *ether* always under a state of *luminosity* of an especial *order*? Its characteristics are such, from its infinite *tenuity* and the **sympathetic activity** with which it is impregnated, that it possesses an *order* of vibratory, oscillatory *velocity*, which causes it to evolve its own *luminosity*. This *celestial*, *latent power*, that induces *luminosity* in this medium, is the same that registers in all aggregated forms of *matter*, *visible* and *invisible*. It is held in the *corpuscular* embrace until liberated by a *compound vibratory negative medium*. [Snell Manuscript]

"Then conditions assert themselves which demonstrate the wonderful power of **sympathetic action** in abeyance to the *laws* by which they are governed." [The Operation of the Vibratory Circuit]

The Neutralization of Magnets

"Thus, either present *elements* are the true *elements*, or else there is the probability before us of obtaining some more high and general *power of nature*, even than *electricity*, and which at the same time might reveal to us an entirely new grade of *matter*, now hidden from our view and almost from our suspicion. - [FARADAY]

Question. How can a *magnet* be robbed almost instantaneously of its *magnetic power*?

Answer. The peculiarity of the *sympathetic conditions* which *conserve* a *magnet* to *polar and anti-polar currents* of the *earth*, prove perfect *sympathetic equation* between *reception and distribution* in that part of the *electrical field* which is classified, in *my system*, as *interatomic vibratory oscillation*.

This *oscillation* represents, in its *corpuscular field of action*, an *alternating wave-motion* of one hundred and twenty-eight thousand four hundred vibratory exchanges per second, between *polar reception and depolar distribution*, thus establishing its perfect *sympathetic concordance* to that *third* of the *electric triple stream* which represents the *sixths* in *vibratory sympathetic physics*. The **sympathetic action** of the *magnet*, when *electrically sensitized*, becomes *subservient* to *polar attraction* as a *medium* through which a portion of its *flow* is *diverted*; no longer *latent*, but highly *active* as long as its *magnetic sympathy* (as electrically *induced*) continues, and it will then *associate* itself with every *medium* in *nature* in which this *element* exists in its *latent state*, from *steel* to *oxygen* at a low *temperature*.

We have now reached a starting-point from which to obtain a *conception* of the manner in which a *magnet* can be *neutralized*, that is, robbed of its *coincident unity*, or *subservience* to *polar negative attraction*." [The Operation of the Vibratory Circuit]

"The *circles* containing the *sensitized disks* - both *polar* and *depolar* - are in *sympathetic* relation to the *polar negative circuits* of the *earth*, and in a *condition* to be brought into *action* by the *negative transmitter*. The *sympathetic conditions* of the *polar and depolar field* of the *circuits* remain *latent* until the *transmitter* is *associated* and the *introductory impulse* given. Then *conditions* assert themselves which *demonstrate* the wonderful *power* of **sympathetic action** in *abeyance* to the *laws by which they are governed*." [The Operation of the Vibratory Circuit]
