

# Sympathetic Positive Propulsion

"In this manner we have "*sympathetic negative attraction*", and "**sympathetic positive propulsion**", with reference to the "*Outreach*" of the *third or dominant current* of the *stream*, which is allied to the *order* of *etheric vibrations*." [Laws of Being, Laws of Being - Annotated, The Nature and Dynamics of Vibration and Toroids]

"Luminiferous ether," he writes, "or *celestial mind force*, a *compound interetheric* element, is the *substance* of which everything visible is composed. It is the great sympathetic *protoplasmic* element; *life* itself. Consequently, our physical organisms are composed of this element. This focalizing, or controlling media, of the physical, has its seat in the *cerebral convolutions*; from which *sympathetic radiation* emanates. This *sympathetic outreach* is *mind flow* proper, or *will force*; *sympathetic polarization* to produce action; *sympathetic depolarization* to neutralize it. *Polar* and *depolar differentiation*, resulting in *motion*. The true *protoplasmic* element sympathetically permeates all forms and conditions of *matter*; having, for its attendants, *gravity*, *electricity*, and *magnetism*; the triple conditions born in itself. In fact, it is the *soul* of *matter*; the element from which all forms of *motion* receive their *introductory impulse*." [Keely and His Discoveries]
