

# Table of Contents1 - Harmonies

## CONTENTS.

### INTRODUCTION.

The scheme endeavours to prove that the development of [harmonies of sound and of colours](#) is regulated by the [law of Evolution](#) as gained from the [Scriptures](#)

- Youthful impressions regarding my great-uncle Dr. Darwin's views
- My cousin [Charles Darwin](#)'s views touched upon
- The scheme involves the [belief](#) that [life](#) developing from the [Almighty](#) is the general key to disentangle the intricacies of the [Natural Sciences](#)
- A remark of [Sir John Lubbock](#)'s quoted
- The development of [Numbers](#), the stream of [Time](#), the [Sevens](#) of [Creation](#), &c., may eventually be proved to proceed by the same [laws](#), . . . . . 9

### PART I.

#### CHAPTER I.

General remarks on [harmonies of tones and colours](#)

- The scheme gained without technical knowledge
- Brief explanation of how the [laws](#) were gained
- The development of [numbers](#) showed the "to and fro" in the development of [sounds](#)
- [Multequivalency](#) of [harmonies](#) veering round, or advancing and retiring in musical [clef](#)
- Before judging, close examination requested, . 12

#### CHAPTER II.

General remarks on the method of [harmonies](#) developing on all kinds of instruments, including the human [voice](#)

- Much [paradox](#), but yet the scheme will admit of clear demonstration
- A musical [note](#) compared to a machine, the [motive power](#) not of our creation
- The imperfection of [keyed instruments](#), from some [notes](#) acting two parts, attuned to the ideal of [harmony](#) within us
- [Macfarren](#) quoted on the [echoing](#) power of a cathedral attuning the [Amen](#)
- Why [music](#) as an [art](#) precedes painting
- Philosophers and mathematicians have only studied [music](#) to a certain point
- Every [key-note](#) a [nucleus](#), including the past, the present, and the future; no finality in any ultimate
- The late [Sir John Herschel](#)'s views on the musical [gamut](#) alluded to
- The imperfection of [keyed instruments](#) adapts them to our present powers
- The [laws](#) will be seen to develop the [twelve major](#) and the [twelve minor keys](#) in unbroken sequence and in harmonious [ratio](#); to gain them in [geometric order](#) [as] [keyed instrument](#) should be circular, the [seven octaves](#) interlacing in [tones](#) a lower and a higher series, . 15

#### CHAPTER III.

On [colours](#) developing by the same [laws as musical harmonies](#)

- The physical properties of [light](#) and [darkness](#) briefly considered
- If the [laws](#) are correctly gained, [harmonics of tones and of colours](#) will agree
- Quotation from a lecture by Professor [W. F. Barrett](#) on the order of sonorous and luminous [wave-lengths](#)
- Fountain of musical [harmonics](#), [E root of B](#); in colours [yellow](#) and [ultra-violet](#), being tints and shades of [white](#) and [black](#)
- All [harmonics](#) of [sound and colour](#) condense into a primo springing from the [fountain](#)
- [Multequivalency](#) of [tones and colours](#)

- [Wünsch's](#) views nearly one hundred years ago
- [Clerk Maxwell's](#), [Lord Rayleigh's](#), and
