

What We Have Learned

Working and playing with these marvelous [Dynaspheres](#) has taught us many things. A few of which are:

- We learned that [Mind Force](#) is a real [force](#) that can be engineered and built into mechanical devices and [accessed on a personal level](#) to improve ones' [life](#) and life experience.
- [Mind over Matter](#) or [Mind in Matter](#) is real and has been **scientifically proven**.
- We learned that [Love](#) ([sympathetic vibration](#) and [sympathetic oscillation](#)) is a real [force](#) that is active in all areas of our lives, [visible](#) and [invisible](#). While we have been mis-taught these are airy-fairy concepts they are nevertheless real.
- We learned the conventional [Newtonian](#) view of [mass x force](#) (crass [materialism](#)) is wholly inadequate, inaccurate and incomplete for where humanity is going - to an evolved and [awakened](#) state of [consciousness](#).
- That this [awakened state](#) of [mind](#) is real and [can be achieved](#) by anyone adequately motivated to achieve same. And it is this elevated state of [Mind](#) everyone without exception is endeavoring to achieve whether they know or admit to it or not.
- That until and unless this elevated [consciousness](#) is achieved throughout society [science](#) and technology such as is shown by these [dynaspheres](#) will not be a substantial part of humanity's experience but peripheral.
- We learned that most [religions](#) were originally conceived by individuals who achieved some level of [Christ Consciousness](#) and the subsequent [religion](#) was established to help others achieve the same elevated state of [awareness](#). These [religions](#) have since been taken over by the [ignorant](#) and fearful to be used to control and abuse its followers.
- [Science](#) as true [science](#) has a purpose of elevating humanity to higher [consciousness](#) and achievement. But it likewise has been taken over by the [ignorant](#) and fearful to be used to control and abuse others. It's [God-like](#) powers of creativity have been subverted into making weapons and other killing machines and processes.
- We learned it is possible and highly desirable to create machines and processes that are benign, healthy, nurturing and spiritually helpful to humanity instead of control-oriented, destructive and unhealthy polluting systems and weaponry.
- We learned a truer understanding of the nature of [spirit](#), [Mind](#) and [matter](#) such that the universe does not appear to us a a fragmented and fortuitous 'accident' but is an integral part and essential element of the [Mind](#) of Man and its purposeful [evolution](#) towards Whole Mind [Consciousness](#).
- We learned there is a single [Mind of God](#) manifesting individually through all things and persons. [Russell](#) called this force [Light](#) while [Keely](#) called it [Celestial Radiation](#).
- That it was by engineering this [Celestial Radiation](#) ([Light of Mind](#)) [Keely](#) was able to accomplish many extraordinary things not comprehensible to modern [science](#).
- We are piecing together sufficient physics and understanding to enable the development of this science as a practical and useful technology in diverse applications.
