

adherent

Schauberger

The more strongly the [attracting forces](#) become [active](#) in the [developmental process](#), the greater the [quantity](#) of [ennobled magnetolytes](#) ([ascended](#) and [magnetically supercharged ions](#)) that soar [upwards](#) with their **adherents** and the greater the [quantity](#) of less valuable [substances expelled](#) by the [highest-grade elements](#) which have to [solidify](#) under the [effect](#) of the [counter-influences](#) described earlier. And thus through the proper [regulation](#) of these [magnetolytic dissociative processes](#), the [increase](#) and [qualitative improvement](#) of the aforesaid [product](#) of [solidification](#), or [growth](#), can be [enhanced](#) at will. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism]
