

# alloy

## alloy

noun: a mixture containing two or more metallic elements or metallic and nonmetallic elements usually fused together or dissolving into each other when molten ("Brass is an alloy of zinc and copper")

---

## Keely

"If a *disk* of proper *proportions* of *silver*, *gold* and *platinum* were used with the *Trexar* in connection with a "*negative focalizer*" (an accessory used in his *magnetic engine*, which he also calls his "*polar radiator*") the **alloyed disk** would exhibit high *induced cohesion* by *adhering* to this *focalizer* with such *affinity* as to become inseparable from it, notwithstanding any force which might be mechanically applied to pry them apart." [Snell Manuscript]

---

## Schauberger

Goethe called Nature's principal, formative essence the 'Eternally Female' and 'All-uplifting'. I have named it 'Qualigen'[11]. This can only come into being, if all *medial masses* (*water*, *earth*, *air*, etc.) are accelerated 'originally' - *planetarily* and *predominantly centripetally* by means of patented devices designed to create this form of *motion*. The design and the **alloys** used in the construction of these devices, which are continually being improved, are the exact opposites of those used in all areas of industry for the *techno-academic acceleration of mass*. [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

When what had been achieved experimentally with the *test model* was implemented practically, mysterious *cavitation* phenomena appeared, which destroyed even steel *turbine blades* within a short space of time.

It was only after protracted and expensive experiments with **alloys** that these *decomposive* phenomena could be sufficiently inhibited to enable the manufacture of this *turbine* system to begin. This was believed and is still so believed today, to be of such great service to industry and the economy, that a few companies licensed by *Viktor Kaplan* (because of the lucrative business opportunities) spared no material expense or intellectual effort in order to eliminate these *decomposive* effects, which according to measurements were equivalent to peak *ressures* of about 32,000 *atmospheres* (atm). [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

Precisely the opposite is achieved when *water* and its vital *constituents* are *accelerated* in a *suction-intensifying* and invigorating type of *turbine* constructed with special **alloys**, which *densifies* the *water* mechanically and physically, therefore '*specifically*'. In other words, a *concentrative*, *structure-reducing*, and *character-improving* synthesising *current* evolves, which radiates in all directions and also *ur-fertilises* the *substance* that the *emissions* from *pressure-turbines* decomposes. [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

In this fashion all *growth* was also interrupted due to the *shape* and material of unnaturally constructed and **alloyed ploughs**, etc., which resulted in the triggering of *reversed reactions* in the *pressure-sensitive*, *negatively potentiated* and therefore *cool* fertile *nutrient substratum*. [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

If ordinary *air* is *bio-centrifugated* above the *speed of sound* in very specially *contoured* and suitably **alloyed** *development-facilitating devices*, for which an auxiliary *mechanical force* is required in the order of 0.08 kW per *cubic metre* of moved *air*, then the *torque-producing current* (*synthesising current*) mentioned above arises, which also *accelerates* the *device* that *generates* it. This further *accelerates* the *intake* of *air*, which again *intensifies* the strength of the *current*, resulting in an even higher *rate of rotation*, which provokes yet a further increase in the *torque-producing current*, and so on. Ultimately a powerful and highly *potent vacuum* is created

in front of the [generating device](#), while at the same time the [expansive pressure](#) described above exerts a [squeezing, wedging pressure](#) along its [teardrop-like body](#) (see figs. 22[6] & 38). These [suctional and pressural forces](#), which [evolve](#) along a common [developmental axis](#) in the form of a fully developed [dynagen gradient](#) can overcome any [weight](#) or [form of anchorage](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

Practically and factually we are thus presented with the unveiling of the [seven enshrouding veils of Sais](#)[7]. We stand before the [secret](#) of the [genesis](#) of all [life](#) and its [unfoldment](#), which viewed objectively is none other than the [perfection](#) of all that is [raw material](#). It is the eternal [process](#) of [self-renewal](#) out of which are [born](#) the [forces](#) of [growth](#) and [formation](#), as well as those of renewed [decomposition](#) and [reversion](#), which appear in the [form](#) of [synthesising](#) or [analysing currents](#), depending on whether the [medium](#) of [air](#) or [water](#) is moved [naturaesquely](#) in specially constructed and **alloyed** [development-facilitating devices](#), or unnaturally in unsuitable ones. [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

The [source](#) of this [formative](#) and [levitative marvel](#) is the 'higher' [temperature-form](#) that [evolves](#) through the previously described [form](#) of [motion](#), which is produced in very specially [contoured](#) and **alloyed** [development-facilitating ur-forms](#) (extreme [egg-shapes](#)). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

Here we are concerned above all with a [conformity](#) with a natural inner [law of reciprocity](#) today entirely unknown to [science](#). That is to say, with very particular [types](#) of [motion](#) in specially [formed](#) and **alloyed** [development-facilitating devices](#), the [preconditions](#) described in the preceding paragraph are satisfied, and because of this the 'Eternally Feminine', as [Goethe](#) called this [creative essence](#), can press its [counterpart](#) ([oxygen](#)) into the [centrepoint](#) of this [battle](#) and conquer it (see fig. 10). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

[aetheric](#) and [energetic structures](#) and [entities](#); the very thing that even [Christ](#) placed at the [cardinal point](#) of his world-shaking [teachings](#). This [transformation](#) is only possible if very precisely constructed and **alloyed** [calyx](#)[12]- or cup- shaped [vessels](#) are moved in the same way that [priests](#) have demonstrated to us before the [altar](#) for about 2000 years, although they themselves were perhaps unaware of the true [significance](#) of this [swinging, cruciform motion](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

This ideal [fuel](#) is present in a [latent state](#) in the [stones](#), which emit a [cold golden glow](#) when rubbed together under [water](#) - a sign that these [energy-concentrations](#) are [mature](#) and properly **alloyed**. Austria, and the Tyrol in particular, is exceptionally rich in such [minerals](#), [charged](#) with [allotropic formative and levitative substances](#), which can be used to [generate reactive temperatures](#) by very simple means. These can provide a quite ideal [form](#) of domestic [heating](#) and [cooling](#), because it is in this way that [Nature](#) keeps the [ground cool](#) in [summer](#) and [warm](#) in [winter](#). Thanks to this [mineral abundance](#), Austria will become immensely rich, if only it has the [will](#) and the [determination](#) finally to rid itself of those, who do everything entirely back-to-front so as to secure their continuing [existence](#) as so-called [experts](#) and [[The Energy Evolution - Harnessing Free Energy from Nature, New Forms of Motion and Energy](#)]

This special [form](#) of [motion](#), still unknown to conventional [science](#), can [magnetise](#) a [tripolar mass](#) of [air](#) or [water](#) up to a maximum of 36% virtually [without cost](#). To do this a particularly [constructed, profiled](#) and suitably **alloyed** [form](#) is required, which promotes the [evolvment](#) of a [developmentally progressive energy](#), the [power](#) of which [increases](#) in [proportion](#) to the [centripetating rotational velocity](#). In this [process](#) it is possible to overcome [physical weight](#) and [mental torpor](#) effortlessly at almost [no expense](#). Accordingly, [magnetism](#) is therefore [levitism](#), the [creative](#) (metaphysical) [counterforce](#) to [electricism](#), the latter being the [decomposive energy-form](#) that [actuates gravitism](#), or [physical and mental relapse](#) (the [death state](#)). [[The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism](#)]

This [biotechnical system](#) of [mass acceleration](#) produces [upwardly flowing magnetism](#), whose [formative and levitative force](#) increases by the [square](#) of the [radial->axial rotational velocity](#) (see fig. 14) in a [naturaesquely constructed, contoured](#) and **alloyed** [generating device](#). This [system](#) is still unknown to today's purely

mechanistic science, which is founded on too low a level of knowledge. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism]

"At the intersection of two temperature gradients atomic energy is released. Whether it is a formative or destructive energy is determined in each case by the type of movement and the composition of the **alloys** used to build the motion-producing machine." [Viktor Schauberger, Implosion Magazine, No. 71, p. 12.] [The Energy Evolution - Harnessing Free Energy from Nature, THE NATURE OF WATER - ITS CONDUCTION AND USE FOR TRANSPORT]

3. Through the rising acceleration of the axially moving core-water-masses, the centrifugence of the swirling peripheral water-masses intensifies. This in turn increases the slip-pressure exerted by the suspended ingredients on the naturalesquely shaped and **alloyed** potential-increasing slip-resistances (guide-vanes). Due to the rising velocities the oligodynamic effect also increases, i.e. more and more supplementary influences are freed by the potential-intensifying frictional resistances and due to the water's careful [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]
