

aroused state

Schauberger

Let us consider, for example, a fully-developed [ovum](#) in the [body](#) of a [fertile woman](#). The [reproductive product](#), the [child](#), can only be woken to [life](#) through a particular [forward motion](#), which takes place first. This leads to the [influx](#) of the [fertilising substance](#), to [independent life](#) and thus to [autonomous movement](#). For this [process wise Nature](#) made provision for certain [changes](#) in [shape](#) associated with **aroused** or [excited states](#) without which the coming to [life](#) of a [child](#) is [impossible](#). [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Liquefaction of Coal by Means of Cold Flows](#)]
