

augmented

Increased, enlarged, embellished.

MUSIC: Augmented: a [chromatic](#) half step larger than [perfect](#) and [major](#).

Law of Corporeal Oscillations

"All coherent [aggregates](#) not isolated from like [bodies](#), [oscillate](#) at a [period-frequency](#) varying with the [tensions](#) that **augment** and [diminish](#) the [state](#) of [equilibrium](#)." [Keely, 1894]

"It is through the [action](#) of [nature's](#) [sympathetic forces](#) that [planets](#) are born and their [volume](#) of [matter](#) **augmented**. If the [sympathetic negative polar stream](#) were cut off from the [earth](#), its [molecular mass](#) would become [independent](#), and would [float](#) away into [space](#) as would a [soap bubble](#) filled with [warm air](#). The same [conditions](#) of [governing rule](#) exist in the [planetary masses](#) as between the [mental](#) and [physical forces](#) in our [organisms](#); the [organism](#) representing the [earth](#), and its [link](#) with the [cerebral centers](#) the [connection](#) with the [infinite mind](#). In other words, the [latent energy](#) existing in the [neutral](#) depths of [matter](#), [visible](#) or [invisible](#), remains eternally [subservient](#) and unchangeably linked to the [eternal mind](#). True [science](#) is bastardized by intimating that the [life](#) in [matter](#) can be [destroyed](#) by any [intensity](#) of [thermal negation](#) ([frigidity](#)). Can finite man make use of an [infinite element](#) to [neutralize infinity](#)? [Thermal negation](#) causes [molecular oscillation](#) to [diminish](#), or even seem to cease, but the results brought about from this superficial [appearance](#) of [matter](#) coming to [rest](#) are that the [latent energy](#) existing in the [molecular zone](#) is [transferred](#) to the [intermolecular](#), [increasing](#) the [oscillations](#) of the [intermolecular](#) in the same [ratio](#) that the [molecular](#) is [diminished](#). All the [art](#) that man can [employ](#) to [induce](#) the same [effect](#) on the [intermolecular zone](#) ends here. Granting, however, that it were possible, what would ensue?"
