

basic element

Schauberger

My allegations in this regard were construed as an affront to the honour and prestige of the Establishment and I was requested to provide written proof of these provocative assertions to the university professors I mentioned by name. This I also did and without exception they all had to capitulate. I could prove to them that as a result of [techno-academic systems of motion](#) - a [predominantly centrifugal](#) form of [mass-movement](#) - an [atomic \(electrolytic\)](#) excess [pressure](#) builds up in the [structure](#) of the **basic elements**, thereby producing an increase in [temperature](#); in other words, a [feverish condition](#). In contrast, an [atomic \(magnetic\)](#) low or [negative pressure](#) is generated through a form of [planetary mass-motion](#) in which [centripetence](#) predominates. This gives rise to a [concentrative, negative pressure](#), which functions as a [biological vacuum](#). It was discovered as early as 1908 by Professor [Ernst Ferdinand Sauerbruch](#), who recognised that neither [breathing](#) nor [expansion](#) of the [lungs](#) would be possible if the [biological vacuum](#) were not to exist. He was declared a [fool](#) all the same and dismissed without notice when he told his superior, Professor [Mikolitsch](#), the following:

"Were there no [vacuum](#) between the surface of the [lungs](#) and the [pleura](#), no [intake of breath](#), nor [resistanceless expansion](#) of the [lungs](#) would be possible. Everything would suffocate were this [biological vacuity](#) to be filled with normal, [atmospheric pressure](#) through any form of [perforation](#)." [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

Undoubtedly known to the [high-priests](#) of ancient cultures, these [concentrates](#) of [noble matter \(ethericities\)](#) are responsible for the legendary near-absolute abundance of [food](#) and the [freedom of movement](#) associated with it. Incidentally, these [concentrates](#) were also ultimately responsible for the [disaster](#) of [Atlantis](#), referred to as the [Flood](#) by a circumspect [Church](#), which was the result of the careless control of these elemental [levitative energies](#). In this respect the [Church](#) was quite right, because the [negatively potentiated mother-water \(amniotic fluid\)](#), the physically [first-born](#), will be [precipitated](#) out by these [formative and levitative energies](#) (there is exact proof of this). It is in this [ennobled carrier-substance](#), however, that the [latent](#) higher-grade [atomic energies](#) reside, which make naturally ordained [locomotion](#) possible. These [energies](#), however, can be [transformed](#) into the most developmentally harmful forms of [atomic energy](#) if, for example, a [cyclotron-like centrifugating device](#) is employed as the supposedly correct means for producing [energy](#). Hitherto it has not been known that [vitamins](#), the [concentrates](#) of [noble matter](#) (perfectly developed [fat-formations fermented](#) under the exclusion of [light](#) and [heat](#), which are known to solidify at [death](#)) can be degraded through inferior ([expansively-acting](#)) influences of [heat](#) and [light](#) and are gradually [transformed](#) into the [atomic ptomaine radiation](#) mentioned at the beginning. Only recently has so-called [vacuum-distillation](#) been applied to obtaining high-grade [fat-concentrates](#) from [essential oils](#). For this, however, only [atmospheric-gas-rarefying devices](#), [air-suction](#) or [air-pressure pumps](#) are used, which can never emulate the processes that wise [Nature](#) employs for specifically [densifying](#) these highest-grade [concentrates](#) of [ennobled matter](#). This is the 'Organic' vacuum. Created by a [centripetence-machine](#), it [densifies noble matter](#) through the [co-active influences](#) of higher-grade [motion](#) and [contractile stimuli](#). That is to say, the moved ([accelerated](#)) [mass](#) approaches the [temperatureless](#) and [feverless anomaly state](#) (+4°C - +39.2°F), which is only possible through [mass-acceleration](#) on the [longitudinal axis](#). Nor can the [resistance to motion](#) mentioned earlier evolve during this process for the simple reason that this 'original' system of [mass motion](#) and [acceleration](#), the [dissociative, structure-loosening, positive temperature](#) influences are missing, which would otherwise induce an increase in dangerous [wall-pressures](#). It should be noted that it is entirely immaterial whether a [molecular interaction](#) between **basic elements** is initiated by a [physical](#) or [metaphysical motion-excitation combination](#). In the same way that [social revolutions](#) arise from [psychological stimuli](#), so too can a beneficial [fever](#) and thus the [healing](#) of a supposedly incurable [disease](#) be provoked by a strong inner [stimulus](#), or conversely, sudden [death](#) through a so-called [stroke](#), caused by an abrupt alteration of the [inner interaction](#) between **basic substances**. [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

(d) To the [heating](#) and [cooling](#) of living spaces with the aid of [allotropic mineral elements](#) through the [intensification](#) of the [repulsive power](#) and [performance](#) of [expansive substances](#) (the [radiation](#) of [stocks](#) of **basic elements** from [selenium cells](#). With slight [stimulation](#) these [produce reactive forms](#) of [temperature](#), which

indirectly result in a form of [cooling](#) that acts from below [upwards](#) and a [diffuse form](#) of [heat](#) that acts from [The Energy Evolution - Harnessing Free Energy from Nature, The Practical Application of Cycloid-Space-Curve-Motion arising from Processes of Cold Oxidation]

To say more about this here would be pointless, because up to now nobody knew anything about the [ur-causal energies](#) that dwell in every [substance](#), and especially in very ordinary [pebbles](#). When these are rubbed together under [water](#) they produce a [gleam](#) of [cold light](#). This is an indication that the [bipolar **basic elements**](#) are [mature](#), ready for [release](#) and can be used to [generate](#) those [forms](#) of [temperature](#), which maintain us and all we see around us in the [unstable thermal equilibrium](#) that maintains [health](#). [The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy]

[10] The following excerpt from "Pregnant Water" (Schwangeres Wasser) in [Implosion Magazine](#), No. 117, pp. 60-61, explains this [process](#):

"It is a known fact that no [free oxygen](#) is present at normal [temperatures](#), but that in the [form](#) of [ozone](#) it is loosely [bound](#) to [nitrogen](#) in the [ratio](#) of 3O₂ to 6N₆.

Were it otherwise, then it would not be beneficial to living things. It is only at +40°C (+104°F) that the individual O₂ [molecules](#) appear, which [trigger life-threatening chemical reactions](#) in the [human body](#) and are the [cause](#) of [heat-stroke](#) for example. At about 1,000°C (1,832°F) [single-atom molecules](#) of O, identical to the [oxygen atom](#), appear, which naturally have very specific [effects](#). This is why, despite the [hermetic seal](#), the [high pressure](#) in high-pressure [boilers](#) drops to [medium pressure](#) once the above [atomic transformation](#) has taken place.

Similarly, it is a fact that N (= [nitrogen](#)) is not a uniform **basic element**, but in reality is CH₂, i.e. a [carbone composed](#) of He₃ ([helium](#)), wherein two [atoms](#) of [hydrogen](#) play the [role](#) of [carrier-substance](#) as it were.

Furthermore, it is known that [gaseous water](#) and [liquid water](#) are quite different things. [Gaseous water](#) is OH₂ and [liquid water](#) (OH₂)₆. The strong [action](#) of [gaseous water](#), for example, follows from this, because two [free action quantities](#) or [points](#) become [active](#), whereas [liquid water](#) has no [action quantities](#), because all the [action points](#) are filled with H."
