

# bio-magnetic

## Schauberger

[2] **Dynagen**: This is one of three forms of **Ethericity**, a term that refers to those **supra-normal**, near **non-dimensional**, energetic, **bio-electric**, **bio-magnetic**, **catalytic**, high-frequency, **vibratory**, super-potent entities of **quasi-material**, **quasi-etheric** nature belonging to the 4th and 5th dimensions of **being**. As such these ethericities can be further categorised as 'fructigens', 'qualigens' and 'dynagens', which respectively represent those **subtle energies**, whose function is the enhancement of **fructification** (fructigens), the **generation** of **quality** (qualigens) and the **amplification** of immaterial energy (dynagens). According to their **function** or location these may be **male** or **female** in nature. — Ed. [From Special Edition Mensch und Technik, Vol. 2, 1993, section 3.1]

These explanations provoked a veritable storm of protest in academic circles, forcing me to equip myself and go into action with somewhat heavier artillery. In response to the objections raised during the preliminary patent assessment, I then submitted the following supplementary explanation:

1. As **inseparable trinities**, the media of **earth**, **water** and **air** are the natural **accumulators** of **bio-magnetic** and **bio-electric dynagen** concentrates. These are extremely sensitive to **pressure** and **heat** and may only be accelerated artificially in the original (**primordial**) way, i.e. **planetarily**, wherein **cooling** effects must **predominate**. Any abnormal increase in **heat**, no matter from what cause, triggers **unnatural interactions** between **basic elements** at the expense of the **negatively surcharged, biomagnetic dynagen concentrates**.
2. All **over-illumination** and **over-heating** immediately provokes the release of **decomposive energies**; whether **heating** is the result of **sunlight** or [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

- The silting up and dislocation of the heavy **water-masses**, which must breach their banks, because the **formation** and build-up of the **refluent** (upstream flowing) **bio-magnetic** products of **noble matter** that **ur-fertilise** the **water**, have been arrested through **elimination** of the **form** of **motion** that produces it. This is how the hitherto inexplicable steadiness in draining **water-masses** down a variable **gradient** was lost.[20] [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

The devices for practically implementing the **generation** of the **bio-magnetic formative** and **levitative current** with the aid of **reactive temperatures** (naturalesque expressions of **temperament**) have now been invented and in principle can be **mass-produced**. [The Energy Evolution - Harnessing Free Energy from Nature, Bio-Technology: Active and Reactive Temperatures]
