

breath of death

"This is your next step. We have pictured your simultaneously living-dying body. You must now know that all bodies in all the universe are the same in all respects, whether they are electrons, cells, rocks, metals, trees, men, planets or suns. All of them live and die in the same manner. All breathe in the charging [breath of life](#) and breathe out the **discharging breath of death**. All of them compress heat and [polarize](#) when they breathe in, and expand, cool and [depolarize](#) when they breathe out." [[Atomic Suicide](#), page 9]
