

# celestial sympathetic streams

[Sympathetic Streams](#) which Control the [Action](#) and [Reaction](#) of all [Visible](#) Forms of **Matter**.

What is [light](#) and [heat](#), and how are they evolved? and why are they so intensely perceptible as emanating from the solar world?

[Light](#) and [heat](#), considered theoretically, belong to the highest orders of the phenomenal. They can only be accounted for by the [velocity](#) of [sympathetic streams](#), as interchangeable to and from centres of [negative](#) and [attractive focalization](#). In considering the [velocity](#) of [vibration](#), as associated with the projection of a ray of [light](#), to be at least one hundred thousand billions per second, it is easy to account for the origin and demonstration of these two elements by the action of **celestial sympathetic streams**.

1st. [Light](#) and [heat](#) are not evolved until the force of the vibratory [sympathetic stream](#), from the [neutral center](#) of the [sun](#), comes into [atomic](#) percussive action against the [molecular](#) atmosphere or [envelope](#) of our planet. The visibility of the planets can only be accounted for in this way, some in a great degree, some in less. Innumerable thousands, it may be, remain [invisible](#) to us by not having the conditions surrounding them, and associated with them, which favour the [atomic](#) and [molecular](#) antagonistic [friction](#) necessary to make them [visible](#). The [velocity](#) of a steel ball passing through the atmospheric envelope, at a speed of thousands of billions times less than an [etheric sympathetic stream](#), would be dissipated into vapour in an indefinite period of a second of [time](#). [Light](#) and [heat](#), in a certain sense, are one and the same; [light](#) giving [heat](#), and [heat](#) giving [light](#). The whole mystery, as associated with their [evolution](#), is explained by the bombardment of the [sympathetic etheric stream](#) on the dense portion of the [molecular](#), in seeking the [sympathetic concordant neutral center](#) of the planetary [mass](#) that surrounds the point of [focalization](#).

The [positive and negative interchange](#) of this true [sympathetic stream](#) keeps intact the [magnetic force](#) of the [polar envelope](#) of the earth; making it, as it were, a great [magnet](#) of itself. The fact of this [magnetic force](#) being universally present, on and in our planet, proves the immensurable speed and power of [etheric sympathetic interchange](#). Thus it is that, from the [velocity](#) of these [sympathetic rays](#), the earth's standard of [heat](#) and [light](#) is evolved and kept in balance. This [interchange of sympathetic radiation](#), between the solar world and its system of planets, equates the [sympathetic volume](#) by the reception of the full amount expended on [sympathetic distribution](#); thus showing the never-ending [restoration of equilibrium](#) by the same medium that disturbs it during [intermittent sympathetic action](#). There are very many facts in [vibratory physics](#) which prove that the volume of [heat](#), supposed by many to emanate from the [sun](#), if concentrated upon a centre of the volume represented by the [sun](#), would give enough [focal force](#), if projected upon the system of planets that is under its control, to vaporize then in one month's time. A ray of [heat](#) one billion times greater than the whole volume of the [sun](#) represents could not pass through the dark vacuous boundaries which lie between us and the [sun](#) without being neutralized and absorbed."
