

condense

Schauberger

The **raw materials** out of which this **fine matter** arises under very specific **preconditions**, consist of the **naturalesquely interred earthly remnants** of **former life**. On no account are they senselessly and purposelessly reduced to **dust** and **ashes**, but once again, under particular **preconditions**, they **develop** into the 'peculiar' **axis** in the **form** of the **formative** and **levitative current** mentioned earlier. This **spiritualising** and **uplifting current**, which **inwinds**, **upwardly impels** and **whirls** around like a **tornado**, is partially **condensed** by the above **heat-forms** and can be readily **measured** and **generated** in any **quantity** and **quality** almost without cost. By means of this **formative** and **levitative current** all **growth** can be increased and **qualitatively** improved almost at **will**, and any **weight** can be lifted or moved indirectly at any desired **speed rotationally** and / or **vertically** with a **power** that increases by the **square**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

This may truly appear to be the monstrous **invention** of an unsound **mind** to those who have no inkling what colossal **energies** are contained in a tiny **drop** of **water**, which are either **bound** or **freed** according to the **type** of **motion**. It may also seem just as **utopian** when it is stated that with the aid of these **elemental ur-forces** secreted in the **medium** of **water** and in the **air** (or the **condensed Breath of God**), the entire **production** of **power**, **heat**, **cold** and **light** can be reduced in cost by slightly more than 90% and that with this **formative synthesising current** all **growth** can be increased by about 30% per annum and **qualitatively** improved. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

In this **formative process** the **electrical field-resistance** is also responsible for the **condensing** of the **higher-grade medium**, which in the **process** of **synthesis** described earlier is **essential** for the **physical encasement** and **insulation** of every **energy-form**. The most important **aspect** of the **magnetolytic (formative) dissociative process** is that no **low-grade heat-forms** should **develop** during in this **restructuring process** in which, on the contrary, a **cooling (freshening) temperature influence** evolves. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism]

If on the other hand a **tripolar mass** is **split up** by **suction-intensifying** and **temperature-reducing dynamic influences**, then the true **creative substance (sweet matter)** will be exposed to **revitalising (cooling) temperatures**. In this case the **formative (levitative) sweet-matter** becomes **free, unipolar** and so highly **active** that it **binds, consumes** and **digests** the **oxygen (fertilising substance)**, which has become **passive** under this other **dynamic influence**. The end **product** of this **magnetolytic dissociation** is the **predominantly magnetically charged ion**, whose **original formative and levitative force**, which as everything else in **Nature** is to be understood as an indirect **effect**, can be **intensified** by up to 96%. **Imbued with levitative force**, these **ions suck up** the **inferior matter** and the **generating device** in their **wake** with **elemental ur-force** and encounter the **natural** and therefore **higher-grade forms** of **inwardly falling (impanding) and concentrating (condensing) heat and light** moving in the **opposite direction**. The **product** of this partial **concentration**, which has been **solidified** through these **higher-grade counter-influences** is what is known as '**growth**', (see fig. 15) [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism]

Just a small **heat-influence** is enough to **separate** the **higher factors** from more **inferior** ones contained in good **water**. As the **condensing reversionary elements** of **retro-development**, the latter appear and become **visible** in the **form** of substantial **physical matter**. It should therefore be quite obvious that with the **high temperatures** known to be necessary for contemporary **methods** of **coal liquefaction**, the identical **processes** of **separation** and **concentration** must take place in increased **measure**. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]
