

counter-flowing

Schauberger

which in turn the [allotropic\[1\]](#) primary materials for [growth](#) and [development](#) also reside. Reacting to [bio-centrifugence](#), these [basic substances](#) are [liberated](#) through the [cycloid-space-curve-motion](#) of the [Earth](#) and under the [influence](#) of [reactive cooling substances](#), [consume](#) (bind) the [counter-weighting oxygen](#). [Reactive differences](#) in [potential](#) are created in this way which express themselves as [reactive differences](#) in [temperature](#), which on their part, as all-penetrating [inner outward<->inward](#), [upward<->downward](#) dynamic influences, [intensify](#) the [physical](#) (external) [form of movement](#). This leads to a renewed [intensification](#) of the [inner dynamic processes](#), which once again act to [stimulate](#) additional [motion](#). Thus it is absolutely no wonder that the good old [Earth](#) eternally [rotates](#) about her [peculiarly unique axis](#), because in this special [axis](#) (viz. the [shimmering shaft](#) in a [water vortex](#)) that something [ascends](#), which enables [stationary trout](#) to stand [motionless](#) amidst [torrential flows](#) and to flee [upstream](#) like [lightning](#). A [phenomenon](#) inexplicable in terms of [mechanics](#), because the [trout](#) must not only overcome its own [weight](#), but also that of the **counter-flowing** [dense](#) and [heavy spring water](#). Indeed it can escape [upstream](#) all the more rapidly, the faster the [cold](#) specifically [heavier water-masses](#), which [whirl](#) about their own [axes](#) in exactly the same way that the [Earth rotates](#) about hers, enter its [jaws](#) and [flow](#) out of its [gills](#) through a [system of cycloid-space-curves](#). In this way the particular [axis](#) is formed in which that something returns to its [ur-source](#), which becomes [free](#) through this special [rotating motion](#) and the [frictional motion](#) produced by it. In becoming [free](#) in this way, it then draws the [motion-generating form](#) - in this case the [trout](#) - in its [wake](#), because this **counter-flowing** [energy-form](#) is the [force](#) that enables everything that crawls and flies on this [manure-heap Earth](#) to overcome its own [weight](#). In other words, it is the '[levitational force](#)', without which there would be no [life](#), no [movement](#), no [growth](#) and naturally no [gravitation](#) either. [[The Energy Evolution - Harnessing Free Energy from Nature, New Forms of Motion and Energy](#)]

In the [unnatural, degenerative direction](#) of [acceleration](#), which operates along the [transverse axis](#) ([centrifugally](#)), i.e. in an [axial->radial mode](#), the [magnetism](#) (= [levitism](#)) here acts as the [resistance](#). Compared to the **counter-flowing** [electricism](#), it appears to be in a certain [state of rest](#), the [magnitude](#) of its [resistance](#) or [support](#) [increasing commensurately](#) with the [acceleration](#) of the [downwardly flowing electricism](#) (= [gravitism](#)). This is the [origin](#) of the tragic [misconception](#) that in all [motion](#) the [resistance increases](#) by the [square](#) of the [starting velocity](#). However, in [reality](#) this only happens when any given [mass](#) ([matter](#)) is made to move [technically, hydraulically](#) or [dynamically\[2\]](#), i.e. [axially->radially](#) ([centrifugally](#)), therefore [unnaturally](#). For if any given [mass](#) ([matter](#)) is made to move [radially->axially](#) ([centripetally](#)), then the [upwardly flowing magnetism](#) ([levitism](#)) [increases](#) at the expense of the [disintegrative](#) ([destructive](#)) [electricism](#) ([gravitism](#)) and thus the [naturally ordained formative and levitative forces intensify](#) in [proportion](#) to the [starting](#) ([radial->axial](#)) [rotational velocity](#). With this [type of motion](#), which is of course only possible with very special [motion-inducing shapes](#) ([profiles](#)), the [effective performance](#) amounts to about 96%. In this case only about 4% of the [original formative energies](#) are lost in [producing](#) the [resistance to motion](#) required by [Nature](#). In [technical, hydraulic and dynamic motion](#) precisely the [opposite](#) is the case and this is how the enormous [consumption of fuel](#) came about, which is exclusively expended in a manner [destructive](#) of [Nature](#). [[The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism](#)]
