## Schauberger

This [self-generating force](#), which also [intensifies](#) by the [square](#), not only refutes above all the [conservation of energy law](#), the [law of gravity](#) and the [Second Law of Thermodynamics](#); in short, all rigid [laws](#) of whatever kind, but also renders just as invalid, all those basic [tenets](#) and [principles](#) impossible in [Nature](#), such as the dogmatic [axioms](#) of [theology](#). By enshrining these so-called [laws](#), both [science](#) and [theology](#) have committed several blunders, and through this [identification](#) of their [intentionally](#) or [unintentionally](#) promulgated [fallacies](#), have made fools of themselves for all time. In any event, they gained an advantage in this way, the loss of which will now for the first time reveal the [unholy consequences](#) of the greatest **deception**, although it could merely be [self-deceit](#). For if the [process](#) is [reversed](#), i.e. if the [form of motion actuated](#) by the above [temperature differences](#) is given first place in [naturaesquely constructed](#) and [shaped development-facilitating devices](#), [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]
