If such ennobled [water](#) is drunk, which accumulates normally insoluble [trace-elements](#) in a 'released' state and binds its [oxygen](#) content up to a maximum of 4%[13], then the [dissolution](#) of normally insoluble [sediment accretions](#) takes place, enabling [sclerosis](#), [encrustation](#) of the [blood](#), [sap](#) and [lymph](#) vessels to be [healed](#). The organisms thus treated regain their [metabolic functions](#) as well as their [reproductive](#) abilities. In this way [senile](#) men almost fully recover their [virility](#). After extended [consumption](#) of [regenerated](#) drinking [water](#), even people who wear [glasses](#) can use weaker ones, because the [capillaries](#) of the [eye](#), which supply it with high quality [nutrients](#), will be [purged](#) of **deposits**. [Rheumatic disorders](#) are [cured](#) within a short space of time, for through this general [detoxification](#) the [joints](#) move freely and painlessly again and are provided with a film of [essential oils](#). [Kidney](#) and [gall stones](#) also [dissolve](#) after only a few weeks of drinking such [healing water](#) and are passed out in gravel-like form with the [urine](#). All those suffering from [cancer](#) can get relief from their tearing [pains](#) almost immediately, because the almost [oxygen-free water](#) binds the excess [oxygen](#) in the [blood](#)[14], thus eliminating dangerous [hyperacidity](#). It is therefore not only possible to prevent [cancer](#) in this way, but even to cure this dreadful [disease](#), if this [all-healing water](#) is drunk in good time. The [healing](#) of [rheumy eyes](#) with the aid of [gold earrings](#) also occurs in a similar way. Situated in the [earlobes](#) - the coolest location, they function [bio-catalytically](#) and make any form of [water secretion](#) impossible. If one burns one's finger, then almost intuitively one grasps the [earlobe](#), where the relatively strongest falling [temperature gradient](#) prevails, and an almost instantaneous relief from the [burning sensation](#) is felt. [Catalysts](#) in the form of the [emanations](#) from [gold](#) and [silver](#) not only function [oligodynamically](#) (they kill [pathogenic bacteria](#)), but also build up [apathogenic bacteria](#), as happens in the vicinity of high [springs](#). Having recognised this, a very open-minded doctor, the director of the old peoples' home at Lainz near Vienna, attempted to cure the [sclerotic symptoms](#) of seriously [rheumatic](#) W.W.II soldiers by administering the finest [gold](#) and [silver](#) dust. He only achieved a partial [cure](#), however, because this can only be done with the [infusion](#) of [precious metals](#) in an [organic state](#).

[13] This is slightly equivocal and can be interpreted in two ways: Either 4% of the 100% [oxygen](#) content is bound, or, up to 4% of the 100% [oxygen](#) content is bound, namely 96%. In view of what has been stated in "[The Liquefaction of Coal by means of Cold Flows](#)" on p. 95 of this book, it would appear that the latter interpretation is what is intended here. — Ed.

[14] The free [oxygen radicals](#) are bound. — Ed. [[The Energy Evolution - Harnessing Free Energy from Nature, The Catalysts](#)]

By means of [progressive interactions](#) with [reactive forms](#) of [potential](#), this results in the [segregation](#) of those [elements](#), which in the form of [allotropic intermediate substances](#) were left untouched, whereas the more [inferior substances](#) [descend](#) even further under even stronger [influences](#) of [heat](#) and are even further [broken down](#). Once again what is still useful will be [precipitated](#) out and **deposited**, until the most [inferior substances](#) of all attain their relatively [lowest state](#) of [evolvment](#) and thereby their greatest [degree](#) of [separation](#) from the most [noble](#), which on the other side has [risen](#) to the [highest state](#). In terms of its [height](#) and [depth](#), this is how the above [threshold-element](#) **deposit** comes into [being](#). Therefore through a [graduated process](#) of [deposition](#) according to [quality](#), the variously [potentiated indifferent elements](#) have [different developmental periods](#). Those with a smaller [separation](#) [interact](#) earlier than the others, and logically, have to cover shorter [developmental paths](#) in order to reach the next higher [evolved state](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]

[Rivers](#) that [warm](#) up along their [course](#), **deposit** their [sediment](#), [silt](#) up the [channel](#) and form [deltas](#), so that instead of the [formation](#) of new [dry land](#), [marsh](#) and [swampland](#) have created. [[The Energy Evolution - Harnessing Free Energy from Nature, The Transport of Ore in Double-Spiral-Flow Pipes](#)]

The [origins](#) of all [motion](#) are [differences](#) in [potential](#). If these [differences](#) cannot be maintained during [flow](#), the [water's kinetic energy](#) [waned](#) and the [sediment](#) is **deposited** in the wrong place. New [bends](#) are formed in this way, which have a greater significance than has hitherto been assumed.
