

development-enhancing function

Schauberger

Modern [intuitionless science](#) has regulated the [eternal flow of evolution](#) ([panta Rhei](#)) in the wrong way and thus failed to notice the possibility of generating [ur-forces](#). Instead of additional products of [emulsion](#) possessing **development-enhancing functions**, it had to make do with [development-disturbing reactive forces and resistances to motion](#) that increase by the [square of the reversed form of acceleration](#). According to an age-old [maxim](#), "she half-pulled him down, he half-sank on her". In this play on words there lies a far deeper [meaning](#). It would take too long here to [enumerate](#) all the [catalysts](#) with various [functions](#), which as [Goethe](#) already recognised, form the '[connecting](#)' [emulsifying bond](#). They are [ray-forms](#), upon whose [function](#) the [development-disturbing rising temperature gradient](#) and the development- fostering falling temperature gradient depend. [Paramagnetic catalysts](#) act [decentrally diamagnetic catalysts concentrally](#). This fact alone pin-points the incorrect [form of development](#), which ultimately results in the [destruction of atoms](#). Wise [Nature](#), on the other hand, proceeds by way of [atomic transformation](#), which from, a biological viewpoint is the exact opposite. [Pressure](#) and [fire](#) technology therefore produce [retrogressive atomic energies](#), whereas [implosion](#) technology generates super-powerful, [forward-thrusting atomic energies](#), i.e. an almost 100% [formative and levitative force](#). And so the question arises, what actually is a [catalyst](#)? The answer is simple. It is a [condenser](#) that has been [galvanically alloyed](#) with [oppositely-charged substances](#), which [radiates predominantly negatively potentiated ray-forms](#) into the naturally [inwindingly moved medium](#). This then activates a [flowing diamagnetism](#), the [formative and levitative force](#) that soars upwards and [sucks](#) the [generating device](#) up in its [wake](#), and which can be regulated by the [rate of rotation](#). With this, the [force](#) was rediscovered that enables [air-craft](#) to overcome [gravity](#) effortlessly and stationary machines to be powered for virtually nothing. According to accounts from earlier times, the [high priests](#) of ancient cultures had a commanding [knowledge](#) of this [power](#), which they cherished and guarded like life itself so as to be venerated as [Gods](#) for their skill.
