

# development-facilitating device

## Schauberger

Apart from this, it is an indisputable and demonstrable fact that **B-group temperatures** are about 96% more expensive to produce than the **reactive A-group temperatures** responsible for **formation** and **uplift**, for which natural **development-facilitating devices** and associated **systems of motion** are required. The necessity to work will therefore become progressively less, and **food** and other necessities will increase **quantitatively** and **qualitatively** as **formative** and **levitative power** strengthens. [The Energy Evolution - Harnessing Free Energy from Nature, Bio-Technology: Active and Reactive Temperatures]

If ordinary **air** is **bio-centrifugated** above the **speed of sound** in very specially **contoured** and suitably **alloyed development-facilitating devices**, for which an auxiliary **mechanical force** is required in the order of 0.08 kW per **cubic metre** of moved **air**, then the **torque-producing current** (**synthesising current**) mentioned above arises, which also **accelerates** the **device** that **generates** it. This further **accelerates** the **intake** of **air**, which again **intensifies** the strength of the **current**, resulting in an even higher **rate of rotation**, which provokes yet a further increase in the **torque-producing current**, and so on. Ultimately a powerful and highly **potent vacuum** is created in front of the **generating device**, while at the same time the **expansive pressure** described above exerts a **squeezing**, **wedging pressure** along its **teardrop-like body** (see figs. 22[6] & 38). These **suctional** and **pressural forces**, which **evolve** along a common **developmental axis** in the form of a fully developed **dynagen gradient** can overcome any **weight** or **form** of **anchorage**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Practically and factually we are thus presented with the unveiling of the **seven enshrouding veils of Sais**[7]. We stand before the **secret** of the **genesis** of all **life** and its **unfoldment**, which viewed objectively is none other than the **perfection** of all that is **raw material**. It is the eternal **process** of **self-renewal** out of which are **born** the **forces** of **growth** and **formation**, as well as those of renewed **decomposition** and **reversion**, which appear in the **form** of **synthesising** or **analysing currents**, depending on whether the **medium** of **air** or **water** is moved **naturalesquely** in specially constructed and **alloyed development-facilitating devices**, or unnaturally in unsuitable ones. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

However, if the **mechanical starting impulse** is **activated** first, which must be produced in appropriately **contoured development-facilitating devices**, then **higher cold-forms** arise through which the **fatty-matter** (**carbone** or **sweet matter**), which **reacts** to **centrifugence**,[11] becomes **free**, **unipolar** and highly **active**. In this situation the **oxygen**, which becomes **passive** under this **influence**, is **consumed** (**bound**), providing it has been **dosed** (**dispersed**) **mechanically** and made **palatable** (**thinned out**), (viz. the **swaying** and **fluttering branches** of **plants**). [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Here we are concerned above all with a **conformity** with a natural inner **law of reciprocity** today entirely unknown to **science**. That is to say, with very particular **types** of **motion** in specially **formed** and **alloyed development-facilitating devices**, the **preconditions** described in the preceding paragraph are satisfied, and because of this the 'Eternally Feminine', as **Goethe** called this **creative essence**, can press its **counterpart** (**oxygen**) into the **centrepoint** of this **battle** and conquer it (see fig. 10). [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

This **self-generating force**, which also **intensifies** by the **square**, not only refutes above all the **conservation of energy law**, the **law of gravity** and the **Second Law of Thermodynamics**; in short, all rigid **laws** of whatever kind, but also renders just as invalid, all those basic **tenets** and **principles** impossible in **Nature**, such as the dogmatic **axioms** of **theology**. By enshrining these so-called **laws**, both **science** and **theology** have committed several blunders, and through this **identification** of their **intentionally** or **unintentionally** promulgated **fallacies**, have made fools of themselves for all time. In any event, they gained an advantage in this way, the loss of which will now for the first time reveal the **unholy consequences** of the greatest **deception**, although it could merely be **self-deceit**. For if the **process** is **reversed**, i.e. if the **form** of **motion** actuated by the above **temperature differences** is given first place in **naturalesquely** constructed and **shaped development-facilitating devices**, [The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced

Energy]
