

developmental process

Schauberger

The simplest effect of [catalytic opposites](#), i.e. [fine-structured opposites](#) with [inner interuniting properties](#), or more properly having a 'marrying' tendency ([ur-procreation](#)), can best be observed in the [generation](#) of [electric current](#), which is normally only successfully achieved with so-called [dynamos](#) incorporating [rotors](#) made of [paramagnetic metal](#).

Conversely, if [diamagnetic catalysts](#) are used in [dynamos](#) constructed in exactly the opposite way (so-called [Repulsators](#) - see fig. 7 & figs. 24 ->26), then an [upward flowing diamagnetism](#) is produced, which viewed biologically is to be understood as 'levitation' ([resurrective](#) or [upsuctional force](#)), during which the follow-up [pressure](#) mentioned elsewhere plays a subordinate role. If the **developmental process** is initiated in [reverse order](#), where the [pressural components predominate](#), then super-strong [gravitational forces](#) are freed. [[The Energy Evolution - Harnessing Free Energy from Nature, The Catalysts](#)]

The [crowning law](#) of today's [technology](#) is therefore no [natural law](#), but the [biological consequence](#) of a tragic [error](#) of contemporary [science](#). For if the [naturalesque metabolic process](#) is initiated through equally [naturalesque impulses](#) ([il primo movere](#)), then as the [velocity](#) increases owing to the additional [input](#) from the [inwinding rotary current](#), the [power](#) increases by the [square](#). The [outcome](#) of this **developmental process** is an almost [cost-free](#), [development-promoting mechanical power](#) - the [evolving water](#) (viz. the [atomised water vapour](#)). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

Every **developmental** or [redevelopmental process](#) therefore has its [characteristic source](#), which gives [rise](#) to one or the other [activity](#) ([function](#)).

This involves [two temperature groups](#):

- (A) the [formative](#), [life-affirming](#) ([incremental](#)), and
- (B) the [disintegrative](#), [life-negating](#) ([decremental](#)).

[See T1 and T2.] [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

However, if a [physical](#), [thermal](#) or [chemical starting impulse](#) is first [active](#), which influences the [molecular motion](#) in such a way that the [oxygen](#) becomes [free](#), [unipolar](#) and [aggressive](#) due to the [resurgence](#) of [positive, group B temperatures](#), then having been forced into the [centre](#) of this [combat](#), the [principal formative matter](#) will become [passive](#) and will be [bound](#), [consumed](#) and [digested](#). The [product](#) of this event is the **developmentally** harmful [cavitation current](#) - a variety of the so-called [electric current](#) - which as an exceptionally [analysing current](#) not only pits and corrodes [steel turbine blades](#), but also [decomposes](#) and [dissociates](#) the [blood](#) of the [Earth](#) - [water](#). [[The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water](#)]

[palatable](#)[2] in order to act as [levitational fuel](#) for the others (viz. the branches swaying in the [wind](#), whose [source of motion](#) - the [wind](#) - also arises through [reactive differences](#) in [temperature](#)). The [vertically](#) disposed [forces](#) of [cyclones](#), [typhoons](#), [hurricanes](#), etc. are also founded on this **developmental process** and owe their [kinetic energy](#) to [cold processes](#) of [oxidation](#). [[The Energy Evolution - Harnessing Free Energy from Nature, New Forms of Motion and Energy](#)]

This [perpetuum mobile](#) is also involved when the **developmental process** is [intensified](#) with [Repulsines](#) and, for example, the [substances](#) contained in the [air](#) are subjected to the [fermentation process](#) outlined above. In this way the same thing is achieved practically and factually, but in a slightly different [active form](#). In the same way that the [end-products influence](#) the more basic [factors](#) and [cause](#) them to [move](#), they also [cause](#) them to be [displaced upwards](#) at [cyclonic speeds](#); a [process](#) that also gives rise to [reactive forms](#) of [temperature](#) at the same time. Using these [reactive temperature-forms](#) the [floor](#) can be made warm in a rational way. In spite of the [forces](#) that help us to overcome our own [body-weight](#) so effortlessly, providing both [metabolic processes](#) [[The Energy Evolution - Harnessing Free Energy from Nature, The Economy Founded on Reactively Produced Energy](#)]

The more strongly the [attracting forces](#) become [active](#) in the **developmental process**, the greater the [quantity](#)

of ennobled magnetolytes (ascended and magnetically supercharged ions) that soar upwards with their adherents and the greater the quantity of less valuable substances expelled by the highest-grade elements which have to solidify under the effect of the counter-influences described earlier. And thus through the proper regulation of these magnetolytic dissociative processes, the increase and qualitative improvement of the aforesaid product of solidification, or growth, can be enhanced at will. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism is the Function of Levitism and Electricism is the Function of Gravitism]

Manly Palmer Hall

The establishment of the philosophic rhythm in the nature of an individual ordinarily requires from fifteen to twenty years. [Manly P. Hall]

Man must grow symmetrically - his heart, his mind, and his body must coordinate and complement each other. He must achieve the condition of mental, spiritual, and physical equilibrium. If the mind is over developed, the scientist results; if the heart dominates, the religious fanatic and emotionalist is produced; if the physical nature controls, the materialist is the inevitable product. It is only when all three of these parts unite in the glorification of the divine nature that the composite unit - the spiritual philosopher - becomes a reality. [Manly P. Hall (Spiritual Centers in Man 1978, p.16)]
