

# direction of polarity

## Russell

"Man makes a big gun by making a long tube which he seals at one end and places an explosive there. He even puts a twist in the bore of the gun; to accelerate the [spin of motion](#) around the [still shaft](#) which centers that tube. That motionless explosive occupies one still position in this [zero universe](#) until he ignites it. What then happens? A [two directional explosion](#) takes place. *The recoil is equal to the discharge*, so he might just as well have left both ends of the gun open as far as the effect of [polarization](#) is concerned. The [recoil](#) was the opposite **direction of polarity**, as that explosion began its [division of stillness](#) throughout the entire universe, at the [speed of 186,400 miles per second](#).

Let us analyze what has happened. The center of the explosion is an unchangeable [point of stillness](#) in the [Magnetic Light of Creation](#), but we will call it [gravity](#) because we are seemingly dividing it into a [shaft](#). Because of the tube the explosion cannot expand symmetrically and radially from the point in space which it occupied while still, for it is not enclosed in a [sphere](#). It is enclosed in a [shaft](#). Its [spinnings](#) encircle the walls of the tube at [ninety degrees](#) to the [still shaft](#), which is developed because the explosion can no longer be centered as one point in space, and, therefore, have but [one center of gravity](#) instead of many. It becomes a [series of points in space which form a shaft](#). If you can now comprehend that if the explosion within that tube is obliged to change position and move its [centering point of stillness](#), the projectile which moves is, likewise, a [sequence of points of stillness](#)? You cannot see a projectile being ejected from the other end, but its equivalent is in that [recoil](#)." [Atomic Suicide, page 291]

"The great error of this drawing is that [pressure mirrors](#) of Nature, such as [radar](#), are not erected upon [planes](#) which follow the **direction of polarity** - or [gravity shafts](#). On the contrary, they are erected in [planes of 90 degrees](#) to [polarity](#), or [gravity shafts](#)." [Atomic Suicide, page 295]

"Nowhere in [Nature](#) do [pressure walls](#) exist which are not [90 degrees](#) from the **direction of polarity**." [Atomic Suicide, page 296]
