

# duty

noun: a legal or [moral](#) obligation

noun: things that you have to do as part of your job

noun: a tax that you must pay on something, especially something that you bring into one country from another country

noun: work that you are obliged to perform for [moral](#) or legal reasons

noun: the social force that binds you to your obligations and the courses of action demanded by that force

---

## Schauberger

In [Nature](#) both [temperature groups](#) are active. [Group A](#) provides for the [progressive build-up](#) of what is suitable for higher [development](#). [Group B](#) is responsible for the [precipitating](#) out, [breaking down](#) and [disassembly](#) of everything unfit for such [purposes](#). This has to be removed and as a [life-form](#) must be [annihilated](#), or expressed more correctly, [reduced](#) to the relatively lowest [developmental state](#), prior to attempting a renewed [ascent](#) under entirely different influences. This [temperature-group](#) also becomes [active](#) when any given [life-form](#) has fulfilled the [purpose](#) of its [existence](#), its **duty** to [multiply](#) itself physically or further [develop](#) itself. [Withering](#) away through [decrepitude](#), and as an [over-ripe product](#) of [raw material](#), it is then made available for the [build-up](#) of [qualigen](#) with the aid of [A-group temperatures](#) ([T1 - Schauburger](#)). However, if for any reason [B-group temperatures](#) ([T2 - Schauburger](#)) become [active](#) in the [deceased substance](#), it will be [putrefied](#), [combusted](#) or otherwise [destroyed](#).
