

electric universe of motion

"The entirety of this **electric universe of motion** is expressed in [spirals](#). Every [spiral](#) in Nature is [centered by a hole](#). Every [spiral](#) is a [continuity of rings](#). All Nature is made up of [spiral sections](#), or rings. The coils of the laboratory are spirals. Every section of a laboratory coil is a ring with a hole in it. Even if one puts a steel rod in the core to polarize its ends there is still a [hole of stillness](#) within the rod, for the [electric current](#) spirals the surface of the rod only." [[Atomic Suicide](#), page 130]

"A proper way to connect it to this **electric universe of motion** would be to term it the [Magnetic-electric universe](#), meaning the [spiritual-physical universe](#), or the [Mind-thinking universe](#), in the sense that the [zero Magnetic universe](#) is the [Creator](#), and the [motion universe](#) is [Creation](#)." [[Atomic Suicide](#), page 180]
