

electro-magnetic oscillation

"These two opposing [actions](#) and [reactions](#) constitute the **electro-magnetic oscillations**, or [compression-expansion sequences](#), which are present in every [mass](#) and which constitute the mechanistic or [life principle](#) of the universe. These sequences have a [periodicity of preponderances](#) which are first [preponderantly generative](#) and then [preponderantly degenerative](#), which we know of as the [phenomena of growth](#)." [Russell to NYT - 1930 November 2]
