

faecal

Schauberger

[4] Excremental or **faecal** technology: This expression reflects Viktor Schauberger's view that today's technology is founded on the wrongful combustion of waste matter, such as oil and coal. As the energy-deficient physical residues of formerly vital substances, i.e. the expelled by-products of interactions of a purely energetic nature, he regards them as Nature's faecal matter — hence the term 'excremental'. [The Energy Evolution - Harnessing Free Energy from Nature, The Practical Application of Cycloid-Space-Curve-Motion arising from Processes of Cold Oxidation]
