My allegations in this regard were construed as an affront to the honour and prestige of the Establishment and I was requested to provide written proof of these provocative assertions to the university professors I mentioned by name. This I also did and without exception they all had to capitulate. I could prove to them that as a result of [techno-academic systems of motion](#) - a [predominantly centrifugal](#) form of [mass-movement](#) - an [atomic \(electrolytic\)](#) excess [pressure](#) builds up in the [structure](#) of the [basic elements](#), thereby producing an increase in [temperature](#); in other words, a **feverish condition**. In contrast, an [atomic \(magnetic\)](#) low or [negative pressure](#) is generated through a form of [planetary mass-motion](#) in which [centripetence](#) predominates. This gives rise to a [concentrative, negative pressure](#), which functions as a [biological vacuum](#). It was discovered as early as 1908 by Professor [Ernst Ferdinand Sauerbruch](#), who recognised that neither [breathing](#) nor [expansion](#) of the [lungs](#) would be possible if the [biological vacuum](#) were not to exist. He was declared a [fool](#) all the same and dismissed without notice when he told his superior, Professor [Mikolitsch](#), the following:

"Were there no [vacuum](#) between the surface of the [lungs](#) and the [pleura](#), no [intake of breath](#), nor [resistanceless expansion](#) of the [lungs](#) would be possible. Everything would suffocate were this [biological vacuity](#) to be filled with normal, [atmospheric pressure](#) through any form of [perforation](#)." [The Energy Evolution - Harnessing Free Energy from Nature, The Biological Vacuum - The Optimal Driving Force for Machines]

Undoubtedly known to the [high-priests](#) of ancient cultures, these [concentrates](#) of [noble matter \(ethericities\)](#) are responsible for the legendary near-absolute abundance of [food](#) and the [freedom of movement](#) associated with it. Incidentally, these [concentrates](#) were also ultimately responsible for the [disaster](#) of [Atlantis](#), referred to as the [Flood](#) by a circumspect [Church](#), which was the result of the careless control of these elemental [levitative energies](#). In this respect the [Church](#) was quite right, because the [negatively potentiated mother-water \(amniotic fluid\)](#), the physically [first-born](#), will be [precipitated](#) out by these [formative and levitative energies](#) (there is exact proof of this). It is in this [ennobled carrier-substance](#), however, that the [latent](#) higher-grade [atomic energies](#) reside, which make naturally ordained [locomotion](#) possible. These [energies](#), however, can be [transformed](#) into the most developmentally harmful forms of [atomic energy](#) if, for example, a [cyclotron-like centrifugating device](#) is employed as the supposedly correct means for producing [energy](#). Hitherto it has not been known that [vitamins](#), the [concentrates](#) of [noble matter](#) (perfectly developed [fat-formations fermented](#) under the exclusion of [light](#) and [heat](#), which are known to solidify at [death](#)) can be degraded through inferior ([expansively-acting](#)) influences of [heat](#) and [light](#) and are gradually [transformed](#) into the [atomic ptomaine radiation](#) mentioned at the beginning. Only recently has so-called [vacuum-distillation](#) been applied to obtaining high-grade [fat-concentrates](#) from [essential oils](#). For this, however, only [atmospheric-gas-rarefying devices](#), [air-suction](#) or [air-pressure pumps](#) are used, which can never emulate the processes that wise [Nature](#) employs for specifically [densifying](#) these highest-grade [concentrates](#) of [ennobled matter](#). This is the 'Organic' vacuum. Created by a [centripetence-machine](#), it [densifies noble matter](#) through the [co-active influences](#) of higher-grade [motion](#) and [contractile stimuli](#). That is to say, the moved ([accelerated](#)) [mass](#) approaches the [temperatureless](#) and **feverless** anomaly state (+4°C - +39.2°F), which is only possible through [mass-acceleration](#) on the [longitudinal axis](#). Nor can the [resistance to motion](#) mentioned earlier evolve during this process for the simple reason that this 'original' system of [mass motion](#) and [acceleration](#), the [dissociative, structure-loosening, positive temperature](#) influences are missing, which would otherwise induce an increase in dangerous [wall-pressures](#). It should be noted that it is entirely immaterial whether a [molecular interaction](#) between [basic elements](#) is initiated by a [physical](#) or [metaphysical motion-excitation combination](#). In the same way that [social revolutions](#) arise from [psychological stimuli](#), so too can a beneficial **fever** and thus the [healing](#) of a supposedly incurable [disease](#) be provoked by a strong inner [stimulus](#), or conversely, sudden [death](#) through a so-called [stroke](#), caused by an abrupt alteration of the [inner interaction](#) between [basic substances](#). New Forms of Temperature

"The [inner climate](#) stamps each [individual](#) with its [character](#). Every [life-form](#) has its own individual [anomaly point](#) of health, which makes the orderly [reproduction](#) of the species possible. This also explains why the world of

parasites increases with **fever**." [[Viktor Schauberger](#), [Implosion Magazine](#), No. 71, p. 12.] [[The Energy Evolution - Harnessing Free Energy from Nature](#), [NEW FORMS OF TEMPERATURE](#)]
