

formative substance

Schauberger

Particularly serious mistakes were made through the spreading of **blast-furnace slag** (so-called artificial **fertilisers**), whose **intensified combustion** once again robs the **soil** of its **essential energy concentrates**, the congealed **oily sweetness**, which the **de-energised** and finely pulverised **slag** then drags to itself from the surrounding **negatively potentiated groundwater**. Artificial **fertilisers** therefore remove the **blood** of the **Earth's formative substances**, which it must supply to the plants indirectly for the purposes of further **ennoblement**. In this way too, those **levitational factors** were eliminated which **triable** the specifically heavy **groundwater** to maintain its precarious **suspension** on steep slopes. From this it can be seen how dangerous are the influences of **fire** and the **lower-grade**, expansively and **explosively** functioning **temperatures** that arise from **fire-affected masses**. [The Energy Evolution - Harnessing Free Energy from Nature, Cadaverine Poison in Ray-Form - Ptomaine Radiation]

Now comes a brief **description** of **Nature's principal formative substance** - **metaphysical fatty-matter**[8] - about which a thick book could be written. As a **reactive** or '**higher**' **temperature-form** this comes into **being** with the aid of the **Earth's 'cycloid-space-curve-motion'** under the **exclusion** of **light** and ordinary **heat** in the **cool germinating zone**, the **boundary zone** between the **negatively potentiated geo-atmosphere** and the **positively potentiated external atmosphere**. This then **develops** as a **potential** that **propagates horizontally** in a **wavi-linear movement**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

[8] **Fatty matter**. In its **association** with what **Viktor Schauburger** calls '**sweet matter**', a **creative, formative substance**, this relates to **compounds** principally containing **carbon C** and **hydrogen H** (**carbohydrates** - **CH**) and all the **elements** under the collective term '**carbone**' or '**mother-substances**'. In this regard, despite its general '**neutrality**' as a **carrier substance** (like a **woman** with child), **H** is more inclined to the **feminine** than the **masculine**. — Ed. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Naturally, this **ur-powerfully-active principal formative substance** is barely perceptible in **water** or **air**, because the **naturalesque motion** of the **Earth** has already **transmuted** it into a **metaphysically potentiated state**, where in a **semi-free** and **semi-bound condition** it **characterises** the '**goodness**' and '**intrinsic quality**' of the **aqueous** or **gaseous medium**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

It thus follows that all attempts to combat the **source** of **disease** of whatever kind, are senseless and futile as long as the **formative metabolic processes** are not controlled **causatively** at their **root-level**. This also explains why **pains** disappear and the most serious **diseases** improve markedly when **water** is drunk in which **formative** and **levitative substances** have been **bound** and which further **evolve** at the expense of the **developmentally harmful elements** in the **organism** that consumes such **water**. As a result the **organism** automatically **regains its capacities**, i.e. it becomes physically and mentally **potent** - and therefore **healthy**. [The Energy Evolution - Harnessing Free Energy from Nature, The Life-Current in Air and Water]

Up to now this **formative, levitative, multiplying** and **ennobling natural force** has not only been inhibited, but through the **reversed form** of **mass-acceleration** has been **transformed** into the **decomposive energy-form** that destroys **development-ripe raw-material**. All this happened for the sole reason that **air** and **water** were moved **axially->radially** (= technically, **hydraulically** or even **dynamically**) instead of **radially->axially**, because it was generally believed that the earthly **residues** of former **life decayed** to **dust** and **ashes**! And so it came to pass that these **vital formative substances** were thoughtlessly **decomposed** or **combusted** in order to **produce lower-grade light, temperature** and **power**. In so doing people literally **condemned** themselves to **death** by the very **sweat** of their **brows**. [The Energy Evolution - Harnessing Free Energy from Nature, Magnetism - Electricism]

The **inner ingredients** contained in **carbon (carbone)** can be compared to the **unfertilised reproductive** or **formative substances** of a **mature woman** immediately after **menstruation**. [The Energy Evolution - Harnessing Free Energy from Nature, The Liquefaction of Coal by Means of Cold Flows]

This [product](#) of [synthesis](#) is characterised by the fact that the [ratio](#) between [oxygen](#) and its [carbone counterpart](#) is 4% : 96%, because all the remaining [oxygen](#) has been [transformed](#) into [fertilising substances](#) and then [bound](#). Therefore the new [product](#) of [synthesis](#) has the highest [negative valency](#) and is of [geospheric character](#). Certain [factors](#) relating to these [processes](#) should be noted: In the [scientific synthesising process](#) heat has a [shrivelling effect](#) on the decisive **formative substance** in its [nascent state](#), while [physical pressure](#) ruptures its [outer envelope](#). In the case of [coal liquefaction](#) by means of [cold flows](#) the [increasing cooling](#) on the [developmental path](#) acts to [increase](#) the [potential](#). However, since the [increase](#) in the [potential](#) of the true **formative substance** is of a purely [energetic nature](#), it would be unable to break through the [outer envelope](#) had this not been [mechanically abraded](#) through the [circumvolution](#) and [inner rotation](#) (gyrate within and about itself|about itself and its own axis) caused by the [increasing frictional pressure](#) arising from the doubly [increased velocity](#) of the whole [water-body](#). These [differences](#) demand the closest [attention](#) and [consideration](#). The [product](#) of [synthesis](#) obtained by means of [cold flows](#), [binds](#) itself into its own [waste product](#) ([juvenile water](#)). Therefore apart from a new, fresh and more highly cultured [energy](#), an associated [carrier-substance](#) of the [highest order](#) is also created at the [expense](#) of the gradually [transforming](#) ([internally reconstituted](#)) [stocks](#) of old [water](#). This [two-fold transformation](#) represents the [increase](#) and the [qualitative improvement](#) of what has been [quantitatively increased](#) (the [growth](#) of [water](#)). The finished [product](#) is a crystal-clear [water](#) that has neither [taste](#), nor [smell](#), nor [colour](#), because in this [product](#) of [synthesis](#) all kinds of things are on the loose or have been [loosed](#) ([emancipated](#)), i.e. they have been raised to the [[The Energy Evolution - Harnessing Free Energy from Nature](#), [The Liquefaction of Coal by Means of Cold Flows](#)]
