

generative force

Russell

Gravitation is the [generative force](#) and [radiation](#) is the degenerative force of the universal constant. These are the opposing powers which, within all mass, seek an equilibrium zone of pressure for the potential of that mass.
[[The Universal One, Book 02 - Chapter 12 - Gravitation and Radiation](#), page 141]

Gravitation is the **generative force** of increasing [potential](#) and the **regenerative force** of decreasing [potential](#).
[See [Syntropy](#)] [[The Universal One, Book 02 - Chapter 12 - Gravitation and Radiation](#), [Gravitation and Radiation](#) - page 141]
