Schauberger

This ideal [fuel](#) is present in a [latent state](#) in the [stones](#), which emit a [cold golden glow](#) when rubbed together under [water](#) - a sign that these [energy-concentrations](#) are [mature](#) and properly [alloyed](#). Austria, and the Tyrol in particular, is exceptionally rich in such [minerals](#), [charged](#) with [allotropic formative and levitative substances](#), which can be used to [generate reactive temperatures](#) by very simple means. These can provide a quite ideal [form](#) of domestic [heating](#) and [cooling](#), because it is in this way that [Nature](#) keeps the [ground cool](#) in [summer](#) and [warm](#) in [winter](#). Thanks to this [mineral abundance](#), Austria will become immensely rich, if only it has the [will](#) and the [determination](#) finally to rid itself of those, who do everything entirely back-to-front so as to secure their continuing [existence](#) as so-called [experts](#) and [[The Energy Evolution - Harnessing Free Energy from Nature, New Forms of Motion and Energy](#)]
