

gravital

Adjective: Of or pertaining to [gravism](#), [gravity](#) and [gravitation](#) and/or their functions and dynamics.

Keely

"The [aerial propeller](#) has a [sympathetic polar accumulator and disperser](#) in one [instrument](#), which is entirely distinct from any of the [devices](#) intended for [terrestrial](#) use; also other [mechanical adjuncts](#) not needed on land nor water.

All forms of [non-sympathetic machinery](#) have, associated with them, [conditions](#) of [centrifugal force](#) on the [ratio](#) of the [velocity induced](#); the [diverging power](#) from the [center of induction](#) being governed specifically by its **gravital weight** according to the [diameter](#) it occupies in its [circle of rotation](#).

In a [sympathetic negative circuit](#) this [order of conditions](#) is [reversed](#); for the [power](#) of [neutral attraction](#) draws the [molecules](#) of any [mass](#), no matter what the [weight](#), toward the [center of rotation](#) (instead of toward its [periphery](#)) according to the [intensity](#) of the [negative vibration](#) that is [induced](#) upon that particular [circle](#).

Our [earth](#), in its [routine](#) of [revolution](#), is governed by the same [law](#) in every particular; its [mass](#) tending toward its [centre of neutrality](#) with a [force](#) that is [equivalent](#) to the [character](#) and [velocity](#) of its [rotation](#).⁽³⁾ If its [rotation](#) were [increased](#), the [tendency](#) of everything associated with it would be [increased](#) toward its [centre of neutrality](#) on the same [ratio](#). That is, a [pound](#) in [weight](#) would, under certain [conditions](#) of [increased velocity](#), become two [pounds](#) in [weight](#). The [laws](#) governing the [sympathetic rotation](#) of [vibratory machinery](#) are the same [laws](#) that govern [planetary suspension](#). To those who have not witnessed the [operation](#) of my [devices](#), my [theories](#) must indeed seem wild; but the [laws of nature](#) are the same yesterday today and forever. They know no change; and [sympathetic physics](#), demonstrated mechanically, must triumph over all [ridicule](#) and [opposition](#) in the end. To [contradict](#) the [laws](#) governing [sympathetic rotation](#) is to [contradict](#) the [laws](#) governing [planetary suspension](#), as I am prepared to demonstrate.

If the [earth](#) were [rotated](#) on a [shaft](#) by [mechanical force](#), the present [condition](#) of its [rotations](#) would be [reversed](#); everything on its [surface](#) would fly off at a [tangent](#), on the [ratio](#) of the [velocity induced](#). The [equilibrium](#) of all things would also be changed.

The [gyroscope](#) reveals astounding facts in relation to this [philosophy](#), even when operated [mechanically](#). No other known [device](#) is so nearly associated with [sympathetic vibratory physics](#).

The [vitalization](#) of the [disks](#) for the [polar and depolar field](#) is established on the [ratio](#) of [thirds](#), [sixths](#), and [ninths](#); the [ninths](#) being the [circuit](#) occupied by the [polar field](#), must represent, in the [scale of vitalized focalized intensity](#), 100 in my system: [sixths](#) in the [depolar field](#), or $66 \frac{2}{3}$; and in the [neutral field](#), or [thirds](#), $33 \frac{1}{3}$. The [triplets](#) must represent one true [chord of equation](#). The [sympathetic transmitter](#) transfers any [degree of intensity](#) desired from [zero](#) up to [disintegration](#); all the [transfers](#) being made above the [line of the first inaudible](#), as associated with my [resonating system of transfer](#). On the [sixths](#) and [ninths](#), in the [progressive triple subdivision](#) of the [elements](#) (4) of [water](#), the nearest [sympathetic approach](#) is made to the [high luminous](#), which is the main [sympathetic link](#) to the [earth's polar negative envelope](#), and the one whereby [coordination](#) is effected for [commercial work](#). In short, this [progressive condition](#) establishes the necessary [association](#) between [celestial radiation](#) and [terrestrial outreach](#), in regard to controlling the [polar negative attractive force](#) in [mechanics](#); whether for [aerial navigation](#) or for [terrestrial commercial work](#), in all its multiplied forms.

The [atmospheric envelope](#) of our [earth](#) owes its [activity](#) and its [volume](#) entirely to [celestial radiating forces](#).⁽⁵⁾ Reception and dispersion are kept up by [atomic](#) and [interatomic conflict](#) between the [dominant](#) and [enharmonic currents](#) of the [triune polar stream](#). The [harmonic](#) and [enharmonic current](#) with the [dominant](#) (in the [electric stream](#)) by their [sympathetic association](#) evolve the [energy](#) of [matter](#).

The [mechanical proof](#) of the correctness of my [theories](#), in [sympathetic](#) or [spiritual physics](#), is so overwhelming in its [simplicity](#) that it needs but to be witnessed to convince the most learned or the most simple mind that this

system will place both science and commerce on a platform which will elevate each to a level far higher than those they now occupy." [The Operation of the Vibratory Circuit]

"Science admits that nature works with dual force, though at rest she is a unit. "Nature is one eternal cycle." Keely's discoveries prove that the doctrine of the Trinity should be set down as an established canon of science - the Trinity of force. All nature's sympathetic streams - cerebellic, **gravital**, electric and magnetic - are made up of triple currents. The ancients understood this dogma in a far deeper sense than modern theology has construed it. The great and universal Trinity of cause, motion and matter - or of will, thought and manifestation - was known to the Rosicrucians as prima materia. Paracelsus states that each of these three is also the other two; for, as nothing can possibly exist without cause, matter and energy - that is, spirit, matter and soul (the ultimate cause of existence being that it exists), we may therefore look upon all forms of activity as being the action of the universal or Divine will operating upon and through the ether, as the skilled artificer uses his tools to accomplish his designs; making the comparison in all reverence." [Bloomfield-Moore, More Science]
