

# harmonic equilibrium

## Keely

Energy is a [sympathetic](#) condition inherent in all forms of aggregated [matter visible](#) and [invisible](#), ever present in its [latent](#) condition. The entire physical Universe is simple energy manifesting itself rhythmically in its [latent](#) state in [matter](#), and everywhere, at all times and under all conditions, is exactly the same. This rhythm [Keely](#) claimed exists in the mathematical relations of [thirds](#). Since, therefore, every [mass](#) consists of vibrations in [thirds](#), balanced in **harmonic equilibrium**, it stands in [harmonic](#) relation to every other [mass](#), [terrestrial](#) or planetary. Thus all forms of [matter](#), even as are all forms of [energy](#), become of their very nature interrelated and mutually convertible, one into the other.

Energy is aroused by [sympathetic disturbance of equilibrium](#) and by this conservation becomes transferable. It is an infinite [latent force](#). If it did not exist [latent](#) it could not be generated and there would be no [energy](#) to lose or conserve. The volume of [latent energy](#) in the Universe never increases and never grows less. It will remain tomorrow and forever same as yesterday and today. [THE PHENOMENA PROPERTIES AND LAWS OF VIBRATION ENERGY]

"[Reception](#) and [dispersion](#) are kept up on the [atmospheric envelope](#) of the [earth](#) by the [atomic](#) and [interatomic conflict](#) as "between the [dominant](#) and the [enharmonic](#)". This is brought about by the [reception](#) and [dispersion](#) of [sympathetic streams](#), the [ruling mode](#) of whose [vibration](#) is the [dominant](#), and the [density](#) of the [coarser grades](#) of [matter](#), whose [ruling vibratory mode](#) is the [enharmonic](#).

As every [mass](#) consists of [vibrations](#) in [thirds](#), balanced in **harmonic equilibrium** without [cancellation](#) or [diminution](#) of [energy](#), it stands therefore in [harmonic relation](#) to every other [mass](#). All forms of [matter](#) and of [motion](#) are thus [interrelated](#) and [interchangeable](#). Through [resonance](#), [increasing](#) this [sympathy](#), we can [control](#) the [states](#) of [matter](#)." [Mass Action, Snell Manuscript - the book]
